Nature Hunt:

Civilizing Nature Bernhard Gissibl, Sabine Höhler, Patrick Kupper, 2012-11-01 National parks are one of the most important and successful institutions in global environmentalism Since their first designation in the United States in the 1860s and 1870s they have become a global phenomenon The development of these ecological and political systems cannot be understood as a simple reaction to mounting environmental problems nor can it be explained by the spread of environmental sensibilities Shifting the focus from the usual emphasis on national parks in the United States this volume adopts an historical and transnational perspective on the global geography of protected areas and its changes over time It focuses especially on the actors networks mechanisms arenas and institutions responsible for the global spread of the national park and the associated utilization and mobilization of asymmetrical relationships of power and knowledge contributing to scholarly discussions of globalization and the emergence of global environmental institutions and governance

Nature Sir Norman Lockyer, 1917 Nature Conservation in Southern Africa , 2018-11-26 Nature conservation in southern Africa has always been characterised by an interplay between Capital specific understandings of Morality and forms of Militarism that are all dependent upon the shared subservience and marginalization of animals and certain groups of people in society Although the subjectivity of people has been rendered visible in earlier publications on histories of conservation in southern Africa the subjectivity of animals is hardly ever seriously considered or explicitly dealt with In this edited volume the subjectivity and sentience of animals is explicitly included The contributors argue that the shared human and animal marginalisation and agency in nature conservation in southern Africa and beyond could and should be further explored under the label of sentient conservation Contributors are Malcolm Draper Vupenyu Dzingirai Jan Bart Gewald Michael Glover Paul Hebinck Tariro Kamuti Lindiwe Mangwanya Albert Manhamo Dhoya Snijders Marja Spierenburg Sandra Swart Harry Wels

The Nature of Church Camp Christopher W. Anderson, 2023-12-18 *The Nature of Church Camp* An Environmental History of Outdoor Ministry 1945 1980 by Christopher W Anderson explores the mid twentieth century history of religious camps and retreat centers to provide new insights into the history of environmentalism in the United States Ecumenical Protestantism and the ecology movement both changed the calculus of American morality after World War II Through archival material case study visits and oral histories Anderson finds that these institutions often reacted to

ecological critiques with temperate but gradual reforms However camps and outdoor ministries by virtue of their natural settings and sizable acreage soon provided a new way to explore the history of spirituality and ecology moving away from the conference campus and using nostalgia for the frontier instead to make arguments about the meaning of the American nation and the value of democracy This new way of thinking was reflected throughout the camps and enthusiastically endorsed decentralized small group camping By examining the conduct of church camps and conferences before during and after the ecological era Anderson shows how environmental stewardship became the dominant paradigm for Protestant environmentalism why that is a flawed and fractious model and why it has stalled [Nature](#) Marie Addyman,2021 A journey through texts on about or reflecting our experience of the natural world [Encyclopedia of Religion and Nature](#) Bron Taylor,2008-06-10 The Encyclopedia of Religion and Nature originally published in 2005 is a landmark work in the burgeoning field of religion and nature It covers a vast and interdisciplinary range of material from thinkers to religious traditions and beyond with clarity and style Widely praised by reviewers and the recipient of two reference work awards since its publication see www.religionandnature.com ern this new more affordable version is a must have book for anyone interested in the manifold and fascinating links between religion and nature in all their many senses **Representations of "Japanese Nature"** Emiko Ohnuki-Tierney,2025-02-01 Nature as a concept and word is extremely elusive yet it is commonly taken for granted that the pristine nature is out there This book explores the factors that have naturalized the idea of nature as pristine into our psyche and as something that has a spatial visual and temporal dimension for seasons Much emphasis is given to the inhabitants demonstrating the dynamic characteristic of nature As a study done over a long period of history Representations of Japanese Nature shows the mutual support between conceptual principles of nature and the daily activities of the people *Nature* London ,1871 *The Nature of Endangerment in India* Ezra Rashkow,2023-01-30 This book is a study of the concepts of endangerment and extinction Examining interlinking discourses of biological and cultural diversity loss in western and central India it problematizes the long history of human endangerment and extinction discourse
