The Catholic Encyclopedia: Diocese-Fathers ,1909 **The Catholic Encyclopedia** Charles George Herbermann,1913 Athens and Jerusalem Jack A. Bonsor,2003-10-30 *Kant's Modal Metaphysics* Nicholas F. Stang,2016-03-18

What is possible and why What is the difference between the merely possible and the actual In Kants Modal Metaphysics Nicholas Stang examines Kants lifelong engagement with these questions and their role in his philosophical development This is the first book to trace Kants theory of possibility all the way from the so called pre Critical writings of the 1750s and 1760s to the Critical system of philosophy inaugurated by the Critique of Pure Reason in 1781 Stang argues that the key to understanding both the change and the continuity between Kants pre Critical and Critical theory of possibility is his transformation of the ontological question about possibility what is it for a being to be possible into a question in transcendental philosophy what is it to represent an object as possible The first half of Kants Modal Metaphysics explores Kants pre Critical theory of possibility including his answer to the ontological question about the nature of possibility his rejection of the traditional ontological argument for the existence of God and his own argument that God must exist to ground all possibility The second half examines why Kant reoriented his theory of possibility around the transcendental question what this question means and how Kant answered it in the Critical philosophy Stang shows that despite this reorientation Kants basic scheme for thinking about possibility remains constant from the pre Critical period through the Critical system What had been an ontological theory of possible being is reinterpreted in the Critical system as a theory of how we must represent possible objects given the nature of our intellect

Marx' Method, Epistemology, and Humanism P.J. Kain,2012-12-06

In recent writings on Marx one finds an increasing interest in his humanism This phenomenon began in the third decade of our century as a reaction against the mechanistic and stereotyped image of Marx 1 characteristic of the Second International and of Stalinism Lukacs in *History and Class Consciousness* 1923 was one of the first to discover this new Marx and he did so even before the most important 2 of the humanistic writings of the young Marx had been discovered With the publication of these writings in 1932 namely the *Economic* 3 and *Philosophic Manuscripts* of 1844 this new outlook was given enormous impetus In these Manuscripts Marx makes the human being the creator and the goal of all reality The objectification of the human essence through labor transforms both society and nature Labor transforms its world into a place which mirrors unfolds and confirms the human being This humanism is a complex and many faceted issue In this book we will be concerned only with a certain part of it i e the epistemology method and

doctrine of nature which it involves Other aspects of it Marx concept of alienation and his theory of labor and the state have 4 been dealt with elsewhere

The Paradoxical Structure of Existence Frederick D. Wilhelmsen, 2017-07-05 For metaphysicians who have imbibed the sober and inebriating teachings of Thomas Aquinas existence is an act the act which makes all things actually to be As the act of existence makes things to be essence makes them to be what they are Essence and the act of existence in other words are really distinct yet together they compose each of the things that are Such an understanding involves a number of paradoxes and Frederick D Wilhelmsen s articulation of them reveals his philosophical genius These paradoxes include the fact that the act of existence does not exist that it can be thought but not conceived by the mind and that truths about God can be known while He himself remains absolutely unknown Wilhelmsen argues the notion that the Christian faith and philosophical reason harmonize while remaining completely distinct from each other Writing in a captivating style Wilhelmsen begins with a discussion of the development strengths and limitations of the ancient Greek philosophical accounts of being Following that he develops such key topics as the problem of existence St Thomas Aquinas understanding of being critical analyses of Hegel s and Heidegger s doctrines of being existence as towards God and a metaphysical approach to the human person The final two chapters develop the sense in which metaphysical thinking is and is not shaped by historical and social factors
