Nature And The Victorian Imagination:

Nature and the Victorian Imagination U. C. Knoepfelmacher, G. B. Tennyson, 1977-01-01 **Nature and the Victorian imagination** U. C. Knoepfelmacher, 1977 **Nature and Victorian imagination**, 1977 **God and Nature** David C. Lindberg, Ronald L. Numbers, 1986-04-29 Since the publication in 1896 of Andrew Dickson White's classic *History of the Warfare of Science with Theology in Christendom* no comprehensive history of the subject has appeared in the English language. Although many twentieth century historians have written on the relationship between Christianity and science and in the process have called into question many of White's conclusions the image of warfare lingers in the public mind. To provide an up to date alternative based on the best available scholarship and written in nontechnical language the editors of this volume have assembled an international group of distinguished historians. In eighteen essays prepared especially for this book these authors cover the period from the early Christian church to the twentieth century offering fresh appraisals of such encounters as the trial of Galileo the formulation of the Newtonian worldview the coming of Darwinism and the ongoing controversies over scientific creationism. They explore not only the impact of religion on science but also the influence of science and religion. This landmark volume promises not only to silence the persistent rumors of war between Christianity and science but also serve as the point of departure for new explorations of their relationship. Scholars and general readers alike will find it provocative and readable.

Nature Exposed Jennifer Tucker, 2013-08-15 Jennifer Tucker studies the interaction of photography and modern science in late Victorian Britain examining the role of the photograph as witness in scientific investigation and exploring the interplay between photography and scientific authority.

[The Anatomy of Nature](#) Rebecca Bedell, 2024-05-14 An illuminating account of the interplay between science religion and nature in nineteenth century landscape painting. Geology was in vogue in nineteenth century America. People crowded lecture halls to hear geologists speak and parlor mineral cabinets signaled social respectability and intellectual engagement. This was also the heyday of the Hudson River School and many prominent landscape painters avidly studied geology. Thomas Cole Asher Durand Frederic Church John F. Kensett William Stanley Haseltine Thomas Moran and other artists read scientific texts participated in geological surveys and carried rock hammers into the field to collect fossils and mineral specimens. As they crafted their paintings these artists drew on their geological knowledge to shape new vocabularies of landscape elements resonant with moral spiritual and intellectual ideas. Rebecca Bedell contributes to current debates about the relationship among art science and religion by exploring this phenomenon. She shows that at a time when many geologists sought to disentangle their science from religion American artists generally sidestepped the era's more materialist science particularly Darwinism. They favored a conservative Christianized geology that promoted scientific study as a way to understand God. Their art was both shaped by and sought to preserve this threatened version of the science. And through their art they advanced consequential social developments including westward expansion scenic tourism the emergence of a therapeutic

culture and the creation of a coherent and cohesive national identity This major study of the Hudson River School offers an unprecedented account of the role of geology in nineteenth century landscape painting It yields fresh insights into some of the most influential works of American art and enriches our understanding of the relationship between art and nature and between science and religion in the nineteenth century It will draw a broad audience of art historians Americanists historians of science and readers interested in the American natural landscape

Environmental Law and Contrasting Ideas of Nature Keith H. Hirokawa, 2014-07-17 Law's ideas of nature appear in different doctrinal and institutional settings historical periods and political dialogues Nature underlies every behavior contract or form of wealth and in this broad sense influences every instance of market transaction or governmental intervention Recognizing that law has embedded discrete constructions of nature helps in understanding how humans value their relationship with nature This book offers a scholarly examination of the manner in which nature is constructed through law both in the hard sense of directly regulating human activities that impact nature and in the soft manner in which law's ideas of nature influence and are influenced by behaviors values and priorities Traditional accounts of the intersection between law and nature generally focus on environmental laws that protect wilderness This book will build on the constructivist observation that when considered as a culturally contingent concept nature is a self-perpetuating and self-reinforcing social creation

Making "Nature" Melinda Baldwin, 2015-08-18 Nature's shifting audience 1869-1875 Nature's contributors and the changing of Britain's scientific guard 1872-1895 Defining the man of science in Nature Scientific internationalism and scientific nationalism Nature interwar politics and intellectual freedom It almost came out on its own Nature under L J F Brimble and A J V Gale Nature the Cold War and the rise of the United States Disorderly publication Nature and scientific self-policing in the 1980s

Modern British Nature Writing, 1789-2020 Will Abberley, Christina Alt, David Higgins, Graham Huggan, Pippa Marland, 2022-03-17 Why do we speak so much of nature today when there is so little of it left Prompted by this question this study offers the first full-length exploration of modern British nature writing from the late eighteenth century to the present Focusing on non-fictional prose writing the book supplies new readings of classic texts by Romantic Victorian and Contemporary authors situating these within the context of an enduringly popular genre Nature writing is still widely considered fundamentally celebratory or escapist yet it is also very much in tune with the conflicts of a natural world under threat The book's five authors connect these conflicts to the triple historical crisis of the environment of representation and of modern dissociated sensibility This book offers an informed critical approach to modern British nature writing for specialist readers as well as a valuable guide for general readers concerned by an increasingly diminished natural world

Victorian Science in Context Bernard Lightman, 2008-07-31 Victorians were fascinated by the flood of strange new worlds that science was opening to them Exotic plants and animals poured into London from all corners of the Empire while revolutionary theories such as the radical idea that humans might be descended from apes drew crowds to heated debates Men and women of all social classes avidly

collected scientific specimens for display in their homes and devoured literature about science and its practitioners Victorian Science in Context captures the essence of this fascination charting the many ways in which science influenced and was influenced by the larger Victorian culture Contributions from leading scholars in history literature and the history of science explore questions such as What did science mean to the Victorians For whom was Victorian science written What ideological messages did it convey The contributors show how practical concerns interacted with contextual issues to mold Victorian science which in turn shaped much of the relationship between modern science and culture **The Arnoldian** ,1984

A Passion for Nature Donald Worster,2008-10-21 I am hopelessly and forever a mountaineer John Muir wrote Civilization and fever and all the morbidity that has been hooted at me has not dimmed my glacial eye and I care to live only to entice people to look at Nature s loveliness My own special self is nothing In Donald Worster s magisterial biography John Muir s special self is fully explored as is his extraordinary ability then and now to get others to see the sacred beauty of the natural world A Passion for Nature is the most complete account of the great conservationist and founder of the Sierra Club ever written It is the first to be based on Muir s full private correspondence and to meet modern scholarly standards Yet it is also full of rich detail and personal anecdote uncovering the complex inner life behind the legend of the solitary mountain man It traces Muir from his boyhood in Scotland and frontier Wisconsin to his adult life in California right after the Civil War up to his death on the eve of World War I It explores his marriage and family life his relationship with his abusive father his many friendships with the humble and famous including Theodore Roosevelt and Ralph Waldo Emerson and his role in founding the modern American conservation movement Inspired by Muir s passion for the wilderness Americans created a long and stunning list of national parks and wilderness areas Yosemite most prominent among them Yet the book also describes a Muir who was a successful fruit grower a talented scientist and world traveler a doting father and husband a self made man of wealth and political influence A man for whom mountaineering was a pathway to revelation and worship For anyone wishing to more fully understand America s first great environmentalist and the enormous influence he still exerts today Donald Worster s biography offers a wealth of insight into the passionate nature of a man whose passion for nature remains unsurpassed

Gender, Geography and Empire Cheryl McEwan,2019-06-03 This title was first published 2000 This text is intended to draw together two important developments in contemporary geography firstly the recognition of the need to write critical histories of geographical thought and particularly the relationship between modern geography and European imperialism and secondly the attempt by feminist geographers to countervail the absence of women in the histories The author focuses on the narratives of British women travellers in West Africa between 1840 and 1915 exploring their contributions to British imperial culture the ways in which they were empowered in the imperial context by virtue of both race

and class and their various representations of West African landscapes and peoples The book argues for the inclusion of women and their experiences in histories of geographical thought and explores the possibilities and problems of combining feminist and post colonial approaches to these histories *Literature and Science in the Nineteenth Century* Laura Otis,2009-04-23 This anthology brings together a generous selection of scientific and literary material to explore the exchanges and interactions between them It shows how scientists and creative writers alike fed from a common imagination in their language style metaphors and imagery It includes writing by Michael Faraday Thomas Carlyle Thomas Hardy Charles Babbage Charles Darwin Louis Pasteur Edgar Allan Poe Mark Twain and many others Machines as the Measure of Men Michael Adas,2015-06-04 Over the past five centuries advances in Western understanding of and control over the material world have strongly influenced European responses to non Western peoples and cultures In *Machines as the Measure of Men* Michael Adas explores the ways in which European perceptions of their scientific and technological superiority shaped their interactions with people overseas Adopting a broad comparative perspective he analyzes European responses to the cultures of sub Saharan Africa India and China cultures that they judged to represent lower levels of material mastery and social organization Beginning with the early decades of overseas expansion in the sixteenth century Adas traces the impact of scientific and technological advances on European attitudes toward Asians and Africans and on their policies for dealing with colonized societies He concentrates on British and French thinking in the nineteenth century when he maintains scientific and technological measures of human worth played a critical role in shaping arguments for the notion of racial supremacy and the civilizing mission ideology which were used to justify Europe s domination of the globe Finally he examines the reasons why many Europeans grew dissatisfied with and even rejected this gauge of human worth after World War I and explains why it has remained important to Americans Showing how the scientific and industrial revolutions contributed to the development of European imperialist ideologies *Machines as the Measure of Men* highlights the cultural factors that have nurtured disdain for non Western accomplishments and value systems It also indicates how these attitudes in shaping policies that restricted the diffusion of scientific knowledge have perpetuated themselves and contributed significantly to chronic underdevelopment throughout the developing world Adas s far reaching and provocative book will be compelling reading for all who are concerned about the history of Western imperialism and its legacies First published to wide acclaim in 1989 *Machines as the Measure of Men* is now available in a new edition that features a preface by the author that discusses how subsequent developments in gender and race studies as well as global technology and politics enter into conversation with his original arguments **Jules Verne Lives!** Gary Westfahl,2023-07-18 This volume is a fresh examination of the works of Jules Verne the pioneering and enduringly popular science fiction writer Essays study Verne s various novels including *Around the World in Eighty Days* *The Mysterious Island* and *The Adventures of Captain Hatteras* Included essays offer analyses of literary responses to Verne s work assessments of film adaptations of his novels and

discussions of steampunk the Verne inspired science fiction subgenre that has influenced writers like Philip Jose Farmer Caleb Carr and Adam Roberts *Nature and Narrative* Markku Lehtimäki, 2025-05-23 The book explores environmental issues in twenty first century Anglophone fiction and how those issues are dealt with by specific literary means It proposes a reciprocal relationship between nature and narrative the idea according to which nature both informs and inspires artistic creations while literary designs and rhetoric also shape our ideas and perceptions of the natural environment It is argued that in order to address design and rhetoric in environmental texts we need a close analysis of those world shaping functions of literary narratives that unite ecocritical and narratological interests The author presents readings of contemporary novels and their varying ways of seeing nature through narrative devices and fictional minds The novels discussed in the book are Hilary Mantel s *Wolf Hall* Toni Morrison s *A Mercy* Ian McGuire s *The North Water* Barbara Kingsolver s *The Lacuna* Paul Harding s *Tinkers* and Enon J M Coetzee s *Elizabeth Costello* Ian McEwan s *Solar* and Jenny Offill s *Weather* **Hybrid Photography** Sara Hillnhuetter, Stefanie Klamm, Friedrich Tietjen, 2021-04-07 This book explores the territories where manual graphic photographic and digital techniques interfere and interlace in sciences and humanities It operates on the assumption that when photography was introduced it did not oust other methods of image production but rather became part of ever more specialized and sophisticated technologies of representation The epistemological break commonly set with the advent of photography since the nineteenth century has probably been triggered by photographic techniques but certainly owes much to the availability of a plethora of hybrid media media that influence the relation of sciences humanities and their methods and subjects This book will be of interest to scholars in art and visual culture photography and history of photography **Developing Animals** Matthew Brower, 2011 How the emergence of wildlife photography changed the way we think about animals
