**A Nature Notes Sampler II** Frank Lang, 2011      **Notes and Commentaries on the Sale of Goods Act 1893 (56 & 57 Vict. Ch. 71)** Richard Brown, 1895      *The Nature-study Review*, 1911      *The Nature-study Review* Maurice Alpheus Bigelow, Fred Lemar Charles, Elliot Rowland Downing, Anna Botsford Comstock, 1914      **Genetic Nature/Culture** Alan H. Goodman, Deborah Heath, M. Susan Lindee, 2003-11-06 Individual essays address issues raised by the science politics and history of race evolution and identity genetically modified organisms and genetic diseases gene work and ethics and the boundary between humans and animals The result is an entree to the complicated nexus of questions prompted by the power and importance of genetics and genetic thinking and the dynamic connections linking culture biology nature and technoscience The volume offers critical perspectives on science and culture with contributions that span disciplinary divisions and arguments grounded in both biological perspectives and cultural analysis      Nordic Narratives of Nature and the Environment Reinhard Hennig, Anna-Karin Jonasson, Peter Degerman, 2020-07-06 Many contemporary environmental risks and global environmental changes occurring today are unprecedented in the history of human life on earth However the images and narratives through which humans relate to these phenomena are built on existing cultural tropes and narrative models Cultural social and historical contexts strongly influence how we construct images and narratives of nature and the environment It is therefore highly important to study such narratives in works of literature film and other forms of cultural expression in relation to the specific circumstances from which they arise Nordic Narratives of Nature and the Environment is the first English language anthology that presents ecocritical research on northern European literatures and cultures The contributors examine specifically Nordic narratives of nature and the environment with a focus on the cultures and literatures of the modern northern European countries Denmark Finland Norway and Sweden including S pmi which is the land traditionally inhabited by the indigenous Sami people Covering northern European literatures and cultures over a period of more than two centuries this anthology provides substantial insights into both old and new narratives of nature and the environment as well as intertextual relations the variety of cultural traditions and current discourses connected to the Nordic environmental imagination Case studies relating to works of literature film and other media shed new light on the role of culture history and society in the formation of narratives of nature and the environment and offer a comprehensive and multi faceted overview of the most recent ecocritical research in Scandinavian studies      Yellowstone Nature Notes ... United States. National Park Service, 1935      Understanding the Alcoholic's Mind : The Nature of Craving and How to Control It Arnold M. Ludwig Evalyn A. Edwards Professor of Psychiatry University of Kentucky School of Medicine, 1987-11-26 Despite the immense obstacles they face many alcoholics do manage to recover The question is how In this groundbreaking book a doctor with over 25 years experience working with alcoholics gets inside their minds and explains the behaviors and thought processes they use to get sober and stay sober In most instances Arnold Ludwig has found that a lasting recovery can only

begin after certain crucial attitude changes Regardless of the motivation of alcoholics powerful forces lure them back to drink To remain sober alcoholics must recognize these forces and the dangerous frame of mind that fuels them Then they must use a variety of techniques that have been demonstrated to be effective for resisting temptation particularly during the early phases of recovery In time individuals will need to develop a set of attitudes values and behaviors which the author describes in detail that perpetuate and strengthen their sobriety Being sober is far more than simply not drinking it is a new way of life Over the years the author has worked with over 1000 alcoholics from all walks of life and within many different settings hospital clinics Alcoholics Anonymous meetings detoxification centers and private homes about one fourth of whom had quit drinking for significant periods of time Incorporating the findings of other researchers into his own and including many clinical vignettes and personal anecdotes he explores the basic principles necessary for achieving a successful recovery Ludwig has especially concerned himself with the nature of alcoholic craving and loss of control and describes the techniques that can help individuals to conquer their urges and also to lessen the chances of relapse This book does not use the word treatment Instead it talks about what is really at the heart of the matter sobriety and how to achieve it It will give new hope and insight not only to the recovering alcoholic but also to their families counselors and doctors *Technical Note* ,1903
