Kelly, Arthur Rose, 2018-05-17 This book is open access and available on www.bloomsburycollections.com It is funded by Knowledge Unlatched In a unique approach to historical representations the central question of this book is what is history By describing history through its supplementary function to the field of history rather than the ground of a study this collection considers new insights into historical thinking and historiography across the humanities It fosters engagement from around the disciplines in historical thinking and from that invites historians and philosophers of history to see clearly the impact of their work outside of their own specific fields and

encourages deep reflection on the role of historical production in society As such Theories of History opens up for the first time a truly cross disciplinary dialogue on history and is a unique intervention in the study of historical representation Essays in this volume discuss music history linguistics theater studies paintings film archaeology and more This book is essential reading for those interested in the practice and theories of history philosophy and the humanities more broadly Readers of this volume are not only witness to but also part of the creation of radical new discourses in and ways of thinking about doing and experiencing history

Kupper,2012-11-01 National parks are one of the most important and successful institutions in global environmentalism Since their first designation in the United States in the 1860s and 1870s they have become a global phenomenon The development of these ecological and political systems cannot be understood as a simple reaction to mounting environmental problems nor can it be explained by the spread of environmental sensibilities Shifting the focus from the usual emphasis on

national parks in the United States this volume adopts an historical and transnational perspective on the global geography of protected areas and its changes over time It focuses especially on the actors networks mechanisms arenas and institutions responsible for the global spread of the national park and the associated utilization and mobilization of asymmetrical relationships of power and knowledge contributing to scholarly discussions of globalization and the emergence of global environmental institutions and governance
