The Matter of History Timothy J. LeCain, 2017-07-31 New insights into the microbiome epigenetics and cognition are radically challenging our very idea of what it means to be human while an explosion of neo materialist thinking in the humanities has fostered a renewed appreciation of the formative powers of a dynamic material environment The Matter of History brings these scientific and humanistic ideas together to develop a bold new post anthropocentric understanding of the past one that reveals how powerful organisms and things help to create humans in all their dimensions biological social and cultural Timothy J LeCain combines cutting edge theory and detailed empirical analysis to explain the extraordinary late nineteenth century convergence between the United States and Japan at the pivotal moment when both were emerging as global superpowers Illustrating the power of a deeply material social and cultural history The Matter of History argues that three powerful things cattle silkworms and copper helped to drive these previously diverse nations towards a global Great Convergence

Minerals in Africa Francis Gudyanga, 2020-08-10 Africa s dire need to industrialize is universally acknowledged and it is evident that the continent s vast mineral resources can catalyze that industrialization This requires the promotion of local beneficiation and value addition of minerals to yield materials on which modern Africa s industry and society can rely This book is therefore about transforming Africa s comparative advantages in minerals into the continent s competitive edge regarding materials Mineral beneficiation and value addition form the basis and provide opportunities for mineral driven Africa s industrialization The scope of the book is three fold with inter connected relationships Information Technical and Policy oriented It will be a useful reference material for mining undergraduate students on beneficiation and value addition of each of the minerals found in Africa The book while presenting a broad overview of beneficiation and value addition of Africa s minerals provides crucial starting material for postgraduate research students and R D institutions who wish to delve into more advanced methods of extraction and utilization of mineral derived materials that are in Africa for the purpose of industrialization of the continent

Evolution of Bioenergetics from Elements to Life David F. Stowe, 2025-01-08 This book begins with the creation of the elements used in life and how these elements as atoms bound together into organic compounds and polymerized into lipids peptides and nucleotides The text stresses the role and importance of the elements C H O N P S the univalent and multivalent ions and the requirement of liquid water to foster prebiotic life Expert author Dr David Stowe explains the role of early molecular interactions in developing the first living prokaryote bacteria and their eventual engulfment as organelles to make eukaryotes that allowed their sophistication into specialized cells and large multicellular organisms The book uniquely traces the genesis of bioenergetics and uses cardiac
