Stephen Budiansky

Natures Keepers New Science Of Nature Ma:

Nature's Keepers Stephen Budiansky, 1995 Argues that man's intervention in nature is often necessary to maintain the balance

Pandora's Garden Clinton Crockett Peters, 2018-05 Pandora's Garden profiles invasive or unwanted species in the natural world and examines how our treatment of these creatures sometimes parallels in surprising ways how we treat each other Part essay part nature writing part narrative nonfiction the chapters in Pandora's Garden are like the biospheres of the globe as the successive chapters unfold they blend together like ecotones creating a microcosm of the world in which we sustain nonhuman lives but also contain them There are many reasons particular flora and fauna may be unwanted from the physical to the psychological Sometimes they may possess inherent qualities that when revealed help us to interrogate human perception and our relationship to an unwanted other Pandora's Garden is primarily about creatures that humans don't get along with such as rattlesnakes and sharks but the chapters also take on a range of other subjects including stolen children in Australia the treatment of illegal immigrants in Texas and the disgust function of the human limbic system Peters interweaves these diverse subjects into a whole that mirrors the evolving and interrelated world whose surprises and oddities he delights in revealing

American Perceptions of Immigrant and Invasive Species Peter Coates, 2007-01-09 Sometimes by accident and sometimes on purpose humans have transported plants and animals to new habitats around the world Arriving in ever increasing numbers to American soil recent invaders have competed with preyed on hybridized with and carried diseases to native species transforming our ecosystems and creating anxiety among environmentalists and the general public But is American anxiety over this crisis of ecological identity a recent phenomenon Charting shifting attitudes to alien species since the 1850s Peter Coates brings to light the rich cultural and historical aspects of this story by situating the history of immigrant flora and fauna within the wider context of human immigration Through an illuminating series of particular invasions including the English sparrow and the eucalyptus tree what he finds is that we have always perceived plants and animals in relation to ourselves and the polities to which we belong Setting the saga of human relations with the environment in the broad context of scientific social and cultural history this thought provoking book demonstrates how profoundly notions of nationality and debates over race and immigration have shaped American understandings of the natural world

Inventing Global Ecology Michael L. Lewis, 2004 Table of contents

Being Human Anna L. Peterson, 2001-05-26 Being Human is one of the few books that begins to integrate theological narratives with scientific ones looking for a compelling correlation between them where modern and religious sensibilities might both be affirmed This is a unique work Bron Taylor Professor and Director of Environmental Studies University of Wisconsin Oshkosh and author of Ecological Resistance Movements The Global Emergence of Radical and Popular Environmentalism Being Human succeeds at accounting for people's conception of humanness and human's relationship with nature no easy task but one that is a crucial starting point for any discussion of environmental ethics Kay Read Associate Professor of Comparative Ethics and Native American Religions

DePaul University and author of *Time and Sacrifice in the Aztec Cosmos* Anna Peterson's *Being Human* is a stellar work of integration Peterson argues that the ideology of human exceptionalism and disconnection from the rest of nature is a major source of social and ecological harm She draws together cultural constructionist Asian Native American feminist and evolutionary thought to present a view of the human as both an integral part of nature and a creator of culture called to develop an ethic of interrelationality for the sake of the wellbeing of the whole earth community Rosemary Radford Ruether Garrett Theological Center author of *Gaia and God An Ecofeminist Theology of Earth Healing* In the postmodern academic climate of slice and dice take no prisoners analysis and critical theory Anna Peterson's book is a welcome breath of fresh air She positions her discussion as a development of rather than a deconstructive triumph over earlier work in the field of environmental philosophy Peterson takes up the themes that are absolutely central to the field the nature of nature human nature and the appropriate relationship between the two Her conclusions are well informed well reasoned reasonable and last but not least beautifully and engagingly expressed Baird Callicott Professor of Philosophy and Religion Studies University of North Texas and author of *Earth's Insights A Multicultural Survey of Ecological Ethics from the Mediterranean Basin to the Australian Outback* California 1997 In *Defense of the Land Essays in Environmental Philosophy and Beyond the Land Ethic More Essays in Environmental Philosophy* Peterson challenges us to think critically about the ideas about nature and humanity that shape our ethical behavior She also brings into critical dialogue insights from a wide variety of religious traditions Buddhist Taoist Navaho Koyukon Catholic and Protestant Peterson helps us think creatively and critically about the task of comparative ethics and the imperatives of environmental ethics This book is a must read for any one concerned with environmental ethics and with comparative ethics Sharon Welch Professor of Religious Studies at the University of Missouri Columbia and author of *A Feminist Ethic of Risk Sweet Dreams in America Making Ethics and Spirituality Work and Communities of Resistance and Solidarity A Feminist Theology of Liberation* [Sponsoring Nature](#) Maano Ramutsindela, Marja Spierenburg, Harry Wels, 2013-11-05 Saving the world's flora and fauna especially high profile examples such as chimpanzees whales and the tropical rain forests is big business Individuals and companies channel their resources to the preservation of nature through various ways one of which is the funding of environmental non governmental organizations ENGOs and community based organizations CBOs This book is the first to comprehensively address this issue and focus on a dominant theme in environmental philanthropy the links between ENGOs and CBOs and their sponsors especially the private sector It has been argued that donor support is based on recipient's perceived expertise and needs with no favouritism of flagship environmental organizations as recipients of donor funds A counterview holds that the private sector prefers to fund mainstream ENGOs for environmental research and policy reforms congenial to industrial capital The authors show that the debate about these arguments together with the empirical evidence on which they are based may shed light on certain aspects of the nature of environmental philanthropy The book evaluates practical examples of environmental

philanthropy from Africa and elsewhere against philosophical questions about the material and geographical expressions of philanthropy and the North South connections among philanthropists and ENGOs and CBOs *International Toxic Risk Management* Aynsley Kellow,1999-10-13 This book is concerned with international regulation negotiation and policy making in the environmental realm *Hog Ties* Richard P. Horwitz,2002 From Charlotte s Web to Porky Pig and Babe Americans betray a curiously deep regard for pigs Hog Ties looks at this phenomenon its relation to American culture and the way in which themes of life and death are played out in the care feeding slaughter and eating of pigs Intermingling silly asides with serious subjects existential concerns with environmental issues the book considers the ways that pigs might help Americans address powerful human concerns **Breaking the Environmental Policy Gridlock** , The contributions to this volume demonstrate how the principles of fiscal responsibility and individual accountability that have been applied to economic and social policies essentially free market principles can be applied successfully to environmental policy The authors offer ten commonsense reforms as a starting point all based on the compelling arguments that a new system of positive incentives can get us more environmental quality at lower cost These reforms include land lease programs for nontraditional commodity production long term transferable land permits landowner compensation for regulated endangered species property and performance based as opposed to technology based water and air pollution laws **Finding the Voice of the River** Gary J. Brierley,2019-09-27 This book addresses societal relationships to river systems highlighting many unexplored possibilities in how we know and manage our rivers Brierley contends that although we have good scientific understanding of rivers with remarkable prospect for profound improvements to river condition management applications greatly under deliver He conceptualizes approaches to river repair in two very different ways Medean competitive and Gaian cooperative Rather than managing rivers to achieve particular anthropogenic goals the former option this book adopts a more than human approach to living with living rivers the latter option applying a river rights framework that conceptualizes rivers as sentient entities Chapters build on significant experience across many parts of the world emphasizing the diverse array of river attributes and relationships to be protected and the wide range of problems to be addressed Although the book has an environmental focus it is framed as an argument in popular philosophy contemplating the agency of rivers as place beings It will be of great value to academics students and general readers interested in protecting river systems
