Nautical Astronomy In New Zealand The Voyages Of James Cook:

Exploring the History of New Zealand Astronomy Wayne Orchiston, 2015-12-08 Dr Orchiston is a foremost authority on the subject of New Zealand astronomy and here are the collected papers of his fruitful studies in this area including both those published many years ago and new material The papers herein review traditional Maori astronomy examine the appearance of nautical astronomy practiced by Cook and his astronomers on their various stopovers in New Zealand during their three voyages to the South Seas and also explore notable nineteenth century New Zealand observatories historically from significant telescopes now located in New Zealand to local and international observations made during the 1874 and 1882 transits of Venus and the nineteenth and twentieth century preoccupation of New Zealand amateur astronomers with comets and meteors New Zealand astronomy has a truly rich history extending from the Maori civilization in pre European times through to the years when explorers and navigators discovered the region up to pioneering research on the newly emerging field of radio astronomy during WWII and in the immediate post war years A complete survey of a neglected but rich national astronomical history this does the subject full and comprehensive justice **Nautical Astronomy in New Zealand** Wayne Orchiston, D. Wayne Orchiston, 1998 The aim of this study is to describe the various astronomers involved in Cook's three voyages to the South Seas their scientific instruments and their New Zealand based astronomical observations before placing eighteenth century New Zealand astronomy in historical perspective In Chapter 5 we show the other face of New Zealand astronomy during the 1770s by briefly examining Maori astronomy Introduction p 12 **The Wide Wide Sea** Hampton Sides, 2025-05-27 NEW YORK TIMES BESTSELLER A thrilling and superbly crafted The Wall Street Journal account of the most momentous voyage of the Age of Exploration which culminated in Captain James Cook's death in Hawaii and left a complex and controversial legacy still debated to this day One of The New York Times Book Review's 10 Best Books of the Year A BEST BOOK OF THE YEAR THE NEW YORK TIMES TIME THE ECONOMIST NPR THE NEW YORKER THE SMITHSONIAN AND KIRKUS REVIEWS In this masterly history Sides tracks the 18th century English naval officer James Cook's third and final voyage across the globe painting a vivid and propulsive portrait The New York Times Book Review On July 12th 1776 Captain James Cook already lionized as the greatest explorer in British history set off on his third voyage in his ship the HMS Resolution Two and a half years later on a beach on the island of Hawaii Cook was killed in a conflict with native Hawaiians How did Cook who was unique among captains for his respect for Indigenous peoples and cultures come to that fatal moment Hampton Sides' bravura account of Cook's last journey both wrestles with Cook's legacy and provides a thrilling narrative of the titanic efforts and continual danger that characterized exploration in the 1700s Cook was renowned for his peerless seamanship his humane leadership and his dedication to science On previous expeditions Cook mapped huge swaths of the Pacific including the east coast of Australia and initiated first European contact with numerous peoples He treated his crew well and endeavored to learn about the societies he encountered with curiosity and without judgment Yet

something was different on this last voyage Cook became mercurial resorting to the lash to enforce discipline and led his two vessels into danger time and again Uncharacteristically he ordered violent retaliation for perceived theft on the part of native peoples This may have had something to do with his secret orders which were to chart and claim lands before Britain's imperial rivals could and to discover the fabled Northwest Passage Whatever Cook's intentions his scientific efforts were the sharp edge of the colonial sword and the ultimate effects of first contact were catastrophic for Indigenous people around the world The tensions between Cook's overt and covert missions came to a head on the shores of Hawaii His first landing there was harmonious but when Cook returned after mapping the coast of the Pacific Northwest and Alaska his exploitative treatment of the Hawaiians led to the fatal encounter At once a ferociously paced story of adventure on the high seas and a searching examination of the complexities and consequences of the Age of Exploration **THE WIDE WIDE SEA** is a major work from one of our finest narrative nonfiction writers

Highlighting the History of Astronomy in the Asia-Pacific Region Wayne Orchiston, Tsuko Nakamura, Richard G. Strom, 2011-08-27 With just 400 pages this title provides readers with the results of recent research from some of the world's leading historians of astronomy on aspects of Arabic Australian Chinese Japanese and North and South American astronomy and astrophysics Of particular note are the sections on Arabic astronomy Asian applied astronomy and the history of Australian radio astronomy and the chapter on Peruvian astronomy This title is of particular appeal to those with research interests in applied historical astronomy archaeoastronomy calendars manuscripts and star charts historical instruments and observatories and the history of radio astronomy

Astronomy Across Cultures Helaine Selin, 2012-12-06 **Astronomy Across Cultures** A History of Non Western Astronomy consists of essays dealing with the astronomical knowledge and beliefs of cultures outside the United States and Europe In addition to articles surveying Islamic Chinese Native American Aboriginal Australian Polynesian Egyptian and Tibetan astronomy among others the book includes essays on Sky Tales and Why We Tell Them and Astronomy and Prehistory and Astronomy and Astrology The essays address the connections between science and culture and relate astronomical practices to the cultures which produced them Each essay is well illustrated and contains an extensive bibliography Because the geographic range is global the book fills a gap in both the history of science and in cultural studies It should find a place on the bookshelves of advanced undergraduate students graduate students and scholars as well as in libraries serving those groups

The New Astronomy: Opening the Electromagnetic Window and Expanding our View of Planet Earth Wayne Orchiston, 2006-01-17 This is an unusual book combining as it does papers on astrobiology history of astronomy and sundials but after all Woody Sullivan is an unusual man In late 2003 I spent two fruitful and enjoyable months in the Astronomy Department at the University of Washington UW working on archival material accumulated over the decades by Woody for a book we will co author with Jessica Chapman on the early development of Australian astronomy The only serious intellectual distraction I faced during this period was planning for an IAU colloquium on transits of Venus scheduled for June 2004 in England where I was down to present the Cook paper I knew Woody was also interested in transits and indeed anything remotely connected with shadows see his paper on page 3 and in discussing the Preston meeting with him it transpired that his 60th birthday was timed to occur just one week later This was where the seed of Woodfest began to germinate Why not invite friends and colleagues to join Woody in Seattle and celebrate this proud event I put the idea to Woody and others at UW they liked it and Woodfest was born

The Transits of Venus William Sheehan, 2010-12 In this unique and fascinating history of science acclaimed popular science writer Sheehan and award winning geographer Westfall take readers back through the centuries to chronicle the intrepid explorations of scientists and adventurers who studied the transits of Venus in the quest for scientific understanding Maps tables
