History, National Security And Geopolitics Hailong Ju, 2015-04-08 This book conducts a comprehensive study on China's maritime strategy It discusses the lessons of maritime power history that must be learnt by Chinese today the relations between China's maritime strategy and domestic developing problems of China the status and influence of maritime strategy from China's overall development strategy perspective and the geopolitical targets of Chinese navy in 2050 China's maritime strategy is one of the most important academic and realistic subjects in the present and future This book is the first book to discuss China's maritime strategy comprehensively in and outside China It will give readers a better sense of why China has to develop its sea power why it lays so much emphasis on Taiwan and the South China sea why the country can make friends with India but not Japan and why China's maritime strategy will never challenge America but has to face the pressure from America's maritime hegemony and so on *Our New National Security Strategy* James J. Tritton, 1992-09-30 This book is an analysis of President Bush's Regional Defense Strategy first unveiled in Aspen Colorado on August 2 1990 This strategy involves a mix of active reserve and reconstitutable forces and General Colin Powell's Base Force If implemented the new strategy and force structure would return significant U S ground and air forces to the continental United States where most

would be demobilized In the event of a major crisis the United States would rely on active and reserve forces for a contingency response much as was done for Operation Desert Storm The new national security strategy is based upon the 25 percent budget cut negotiated with Congress a greatly depleted Russian threat and a new international security environment that assumes two years warning of a European centered global war with the former USSR There are four major critical factors upon which the new strategy depends 1 the continued decline of the Russians as a threat to world stability 2 the ability of the intelligence community to meet new challenges 3 the behavior of the allies and Congress and 4 the ability of industry to meet new demands The new strategy is not simply an adjustment to existing defense doctrine or strategy but rather a fundamental revision of the way the United States has approached defense since 1945 Students and scholars interested in politico military strategy and government policy will find this book of great interest

Security Studies in a New Era of Maritime Competition Jonathan D. Caverley, Peter Dombrowski, 2023-06-06 How do two conventionally powerful nuclear armed but commercially oriented great powers reliant on sea lanes and global maritime infrastructure engage in a long term strategic rivalry When do such competitions lead to crisis instability and even war This book presents a research agenda using a variety of methods to explore this unique competitive environment for China and the United States The most likely great power friction points today are located at sea Any shots fired between China and the United States will likely be between navies and air forces rather than armies While much security studies understandably concentrates on land forces basic concepts such as the importance of territory the offense defense balance technological competition economic warfare and crisis stability do not comfortably apply to maritime competition The chapters in this volume consider the use of naval power including blockades naval diplomacy fleet engagements and nuclear escalation across the spectrum of global politics and international conflict The volume encourages applying the many classic approaches of security studies to this high stakes relationship while considering maritime conflict as distinct from other forms such as land and nuclear that have traditionally occupied the field This work will be of great interest to students of strategic studies international relations maritime security and Asian American politics The chapters in this book were originally published as a special issue of Security Studies

India's National Security Dr Suresh R., 2020-03-10 Maritime security is one of the latest additions to the field of international as well as national security The concept has received growing attention especially due to the intensification of concerns over maritime terrorism since 2000 The rise of modern piracy maritime crimes such as human trafficking and the increasing importance of the blue economy and issues relating to freedom of navigation maritime environmental protection and resource management have resulted in increased significance of maritime security studies A significant number of states and other international actors such as Multinational Corporations MNCs and Transnational Corporations TNCs have placed maritime security high in their security agenda This priority is reflected in several governmental and intergovernmental strategies for maritime security In addition to that the regional grouping in the Indian

Ocean and Indo Pacific such as ASEAN BIMSTEC IORA and IONS have placed maritime security issues high in their agenda

China's Maritime Security Strategy Edward Sing Yue Chan,2021-09-09 This book examines the evolution of China s maritime security strategy and questions what has made China shift from a constrained to a more assertive strategy Historically China has not been an active player in maritime security but in recent years Beijing has begun to pursue policies and measures to safeguard its maritime rights and interests in the Indo Pacific region This growing influence in the region has become a concern for other countries about what kind of sea power China is developing This book seeks to address this concern by providing an overview of the development of China s maritime security strategy from the era of Deng Xiaoping to Xi Jinping It suggests that while the involvement of maritime actors and the development of naval capability have provided the depth to the strategy the national strategic guidelines from each generation of Chinese leadership have determined the overall direction of the maritime security strategy After 40 years of development China has established a set of priorities for its maritime agenda territorial integrity is at the top followed by development and then regional and international maritime cooperation These findings help us to understand China s multidimensional maritime power as being both assertive and cooperative This book will be of much interest to students of naval strategy maritime security Chinese politics and International Relations **National Security Affairs Monograph Series** ,1976
