Naxos Byzantine Art In Greece:

Byzantine Greece: Microcosm of Empire? Archibald Dunn, 2023-08-28 This volume offers a structured presentation of the progress of research into the internal history of a part of the Byzantine world Greece in the centuries before the multiple changes induced or accelerated by the Fourth Crusade Greece is a large area several Early and Middle Byzantine provinces with records archival literary archaeological architectural and art historical most of which are unequalled in terms of their density and range This creates opportunities for useful synthesis and for dialogue with those now engaged in the rewriting or writing of the inner history of Byzantium from Italy to the Caucasus who have been stimulated by or involved in the editing of archives and inscriptions including sigillographic and in the publication of monuments excavations and surveys for all of which the Greek space the elladik kh ra is a particular and fertile focus of activity as the conference showed Much of the material presented here can usually only be found in specialised publication and indeed much in Greek alone But properly contextualised this material about the Greek space deserves to be brought into the dialogues or debates at the heart of Byzantine Studies for instance about the Late Antique boom urban life the Dark Age economic change the nature of the Byzantine revival and of social socio economic and ethnic groups The studies here synthesise such research enabling the Greek space as a case study in the evolution of a significant region to the west of Constantinople to take its place more fully as a point of reference in such dialogues or debates Equally it provides frameworks for archaeologists dealing with Greece from Late Antiquity onwards and there are now many with which to engage and it makes available a rich source of comparative material for those studying the other regions of the Byzantine world whether historically or archaeologically in Southeastern Europe Italy or Turkey

Arms and Armour in Byzantine Art, 2025-10-30 This volume examines the iconography of military equipment in the art of the Orthodox milieu in the Middle Ages The authors address various problems such as the veracity of representations of military equipment the issue of presence of archaisms in the artwork and the meaning and symbolism of armour in the Byzantine world Taken together these studies offer valuable insights for archaeologists and art historians concerned with the legacy of the medieval world and for scholars interested in the history of military equipment Contributors are Andrea Babuin Timothy G Dawson Dejan Gjorgjievski Piotr Grotowski Marka Tomi and Mamuka Tsurtsunia

Arms and Armour of the Warrior Saints Piotr Grotowski, 2010-09-24 The question of the independence of Byzantine iconography continues to draw attention Following extensive research on the persistence of Classical motifs in Byzantine art interest has recently turned to the originality of the latter and its reliability as a historical source This study examines whether military equipment armour weapons insignia and costume shown in images of the warrior saints reflects items actually used in the mid Byzantine Army or merely repeats Classical forms Such representations are compared with documentary evidence gathered chiefly from Byzantine military manuals The author demonstrates that military equipment being a vital branch of material culture subject to constant evolution provides a good indicator of
