Congress. House. Committee on Education and the Workforce,2002 **Credentials, Curriculum, and Access** Melinda Mechur Karp,Katherine L. Hughes,James B. Jacobs,2002 The question of how to best prepare nurses for practice continues to be debated extensively The crux of the debate is whether a bachelor of science in nursing BSN should be required of all registered nurses in the United States or whether an associate degree in nursing ADN and diploma programs adequately prepare novice nurses for practice Most of the literature on the relative effectiveness of BSN and ADN programs is inconclusive or dated Most relevant studies focus on one type of program and do not directly compare how BSN and ADN graduates perform on the job The findings of the few studies that do compare outcomes of BSN and ADN programs are mixed What the literature does suggest is that the differences between ADN and BSN programs may not greatly affect nurses ability to perform basic nursing tasks

and that both programs prepare registered nurses for entry level positions in most health care settings The following lessons for those involved in planning and delivering nursing education were identified from the literature 1 move carefully and work together 2 conduct further research and use it 3 create clearer career ladders 4 differentiate between novice and advanced practice and 5 ease movement between the ADN and BSN Contains 60 references MN Nursing in Contemporary Society Linda Carol Haynes, Howard Karl Butcher, Teresa A.
