existence of a highly advanced global maritime culture that disappeared amid great earth changes and rising seas 14 000 to 11 500 years ago nearly causing our species extinction and leaving humanity's collective psyche deeply scarred Tracing humanity's reemergence after these prehistoric catastrophes Clow explains how these events in the deep past influence our consciousness today Guided by Carl Johan Calleman's analysis of the Mayan Calendar she reveals that as the Earth's 26 000 year precessional cycle shifts our evolution is accelerating to prepare us for a new age of harmony and peace She explains how we are beginning a collective healing as ancient memories of prehistory awaken in our minds and release our unprocessed fear Passed from generation to generation this fear has been responsible for our constant expectations of apocalypse She shows that by remembering and moving beyond the trauma of our long lost past we bring the era of cataclysms to an end and cross the threshold into a time of extraordinary creative activity *Fire in the Stone* Nicholas Ruddick,2012-01-01 The genre of prehistoric fiction contains a surprisingly large and diverse group of fictional works by American British and French writers from the late nineteenth century to the present that describe prehistoric humans Nicholas Ruddick explains why prehistoric fiction could not come into being until after the acceptance of Charles Darwin's theories and argues that many early prehistoric fiction works are still worth reading even though the science upon which they are based is now outdated Exploring the history and evolution of the genre Ruddick shows how prehistoric fiction can offer fascinating insights into the possible origins of human nature sexuality racial distinctions language religion and art The book includes discussions of well known prehistoric fiction by H G Wells Jules Verne J H Rosny A n Jack London William Golding Arthur C Clarke and Jean M Auel and reminds us of some unjustly forgotten landmarks of prehistoric fiction It also briefly covers such topics as the recent boom in prehistoric romance notable prehistoric fiction for children and young adults and the most entertaining movies featuring prehistoric humans The book includes illustrations that trace the changing popular images of cave men and women over the past 150 years [The Third Planet](#) Nathan Skaggs,2013-07-02 Following an astronomical catastrophe Heracles leads an expedition from a dying world in search of a suitable planet for his species During their search of the cosmos Heracles and his companions make phenomenal discoveries After several months in space Heracles locates a solar system with a habitable planet third from its sun in the far reaches of the galaxy **The Language of the Past** Ross Wilson,2016-07-14 The Language of the Past analyzes the use of history in discourses within the political media and the public sphere It examines how particular terms phrases and allusions first came into usage developed and how they are employed today To speak of something or someone as representing the stone age or characterize an institution as byzantine to describe a business relationship as feudal or to disparage ideals or morality as Victorian refers to both a perception of the past and its relationship to the present Whilst dictionaries and etymologies define meanings and origin points of words or phrases this study examines how history is maintained and used within society through language Detailing the specific words and phrases associated with particular periods used to describe contemporary society this thorough

examination of language and history will be of great interest to those studying historiography social history and linguistics
