Basics Architecture 01: Representational Techniques Lorraine Farrelly, 2007-11-18 Basics Architecture 01

Representational Techniques examines the techniques used to represent architectural design. It describes a broad array of methodologies for developing architectural ideas ranging from two and three dimensional conceptual sketches through to the working drawings required for the construction of buildings. It offers a range of practical drawing methods showing how to present and plan layouts, make conceptual sketches, work with scale, use collage and photomontage to create contemporary images, along with techniques to prepare and plan design portfolios. The book also deals with contemporary computer modelling and drawing techniques. Students and practitioners will find this a useful and clear companion to a vital aspect of architectural design.

Basics Landscape Architecture 01: Urban Design Tim Waterman, Ed Wall, 2017-11-02 Basics Landscape Architecture 01 Urban Design seeks to define and describe the role played by landscape architecture in urban design, an interdisciplinary practice that is concerned with defining the form of human settlements. It provides a brief history and definition of urban design and the roles of the various professions involved. Urban Design looks at the elements of urban form and the importance of contextual details from the scale of the city and its region to the importance of materials. The text uses case studies to explore the philosophies and methodologies of urban design and to explain the importance of urban design to landscape architecture and in turn the importance of landscape architecture to urban design.

The New York Architect, 1908 **Basics Interior Architecture 01: Form and Structure** Graeme Brooker, Sally Stone, 2007-12-26 The subject of interior architecture currently lacks a detailed and educationally focussed text. The new Basics Interior Architecture series will fill this gap and expand students' knowledge of interior design, interior architecture and give an insight into some of the principles and methods of professional interior architects. The first book in the Basics Interior Architecture series, *Form Structure*, will propose a method of analysis, understanding and exploitation of the existing building that can be used to realise the design of a new insertion.

Douglas Snelling Davina Jackson, 2016-12-01 Douglas Burrage Snelling 1916-85 was one of Britain's significant emigrant architects and designers. Born in Kent and educated in New Zealand, he became one of Australia's leading mid-century architects of luxury residences and commercial buildings and a trend setting designer of furniture interiors and landscapes. This is the first comprehensive study of Snelling's pan-Pacific life, works and trans-disciplinary significance. It provides a critical examination of this controversial modernist, revealing him to be a colourful and talented protagonist who led antipodean interpretations of American, especially Wrightian and southern Californian architecture, design and lifestyle innovations.

Wright on Exhibit Kathryn Smith, 2022-07-12 The first history of Frank Lloyd Wright's exhibitions of his own work, a practice central to his career. More than one hundred exhibitions of Frank Lloyd Wright's work were mounted between 1894 and his death in 1959. Wright organized the majority of these exhibitions himself and viewed them as crucial to his self-presentation as his extensive writings. He used them to promote his designs.

appeal to new viewers and persuade his detractors Wright on Exhibit presents the first history of this neglected aspect of the architect's influential career Drawing extensively from Wright's unpublished correspondence Kathryn Smith challenges the preconceived notion of Wright as a self promoter who displayed his work in search of money clients and fame She shows how he was an artist architect projecting an avant garde program an innovator who expanded the palette of installation design as technology evolved and a social activist driven to revolutionize society through design While Wright's earliest exhibitions were largely for other architects by the 1930s he was creating public installations intended to inspire debate and change public perceptions about architecture The nature of his exhibitions expanded with the times beyond models drawings and photographs to include more immersive tools such as slides film and even a full scale structure built especially for his 1953 retrospective at the Guggenheim Museum Placing Wright's exhibitions side by side with his writings Smith shows how integral these exhibitions were to his vision and sheds light on the broader discourse concerning architecture and modernism during the first half of the twentieth century Wright on Exhibit features color renderings photos and plans as well as a checklist of exhibitions and an illustrated catalog of extant and lost models made under Wright's supervision

Architecture, Media, Populism... and Violence Graham Cairns, 2022-10-07 The Storming of the Capitol was for many the culminating media performance of the four year presidency of Donald Trump His presidency and its final act bore all the hallmarks of a 21st century form of populism and media politico spectacle that may yet come to dominate the political scene in the US and worldwide for years to come The questions that such events raise are complex varied and operative across a multitude of disciplines This book engages with these vexed questions in the broad fields of politics and media but does so uniquely through the prism of architecture This book does not however limit its view to the recent events in Washington DC or the United States Rather it seeks to use those events as the starting point for a critique of architecture in the tapestry of mediated forms of protest and political action more generally Each chapter draws on case studies from across timeframes and across nations The book sharpens our critique of the relationship between direct political action its media representation and the role it assigns to architecture as played out globally in the age of mass media In doing so it opens up broader debates about the past present and future roles of architecture as a political tool in the context of international political systems now dominated by changing and unpredictable uses of media and characterised by an increasingly volatile and at times violent form of political activism It is essential reading for any student or researcher engaging with these questions **General**
