substantial work in the legislative studies field But what do we know about legislatures today and are there clear criteria for comparing and classifying them This is a new review of the state of our knowledge of parliament and tackles key questions Do legislatures matter in legislative terms and if so how much What is the extent of the legislature s control of the legislative process How can we classify legislatures on the basis of their relative legislative performance Five measures of the policy power of parliaments are applied in the country region chapters This book was previously published as a special issue of the leading Journal of Legislative Studies *Tension, Dilemma and Conflict in Party-Candidate Campaign Strategies* Lukas

Hohendorf, 2025-06-30 This book examines the campaign communication of political candidates in parliamentary democracies set within the broader trends of globalization and political personalization It explores how district candidates balance local voter preferences national party demands and personal beliefs in their campaigns Using Germany as a case study and drawing on a wide range of data sources the book reveals how situational factors such as electoral rules candidate experience and local party organization influence campaign strategies It demonstrates how campaign positions in parliamentary democracies often deviate from national party stances with implications on party unity and democratic representation Framed by the pressing challenges of regional divergence and the rise of political personalization the book shows why studying individual candidate behavior rather than simply focusing on party leaders is crucial for understanding modern democratic systems This book will be a key resource for scholars students and practitioners in the fields of political parties and elites electoral studies political communication and more broadly comparative politics **International**

Legislative Agenda Setting Bjorn Erik Rasch, George Tsebelis, 2013-07-04 Setting the agenda for parliament is the most significant institutional weapon for governments to shape policy outcomes because governments with significant agenda setting powers like France or the UK are able to produce the outcomes they prefer while governments that lack agenda setting powers such as the Netherlands and Italy in the beginning of the period examined see their projects significantly altered by their Parliaments With a strong comparative framework this coherent volume examines fourteen countries and provides a detailed investigation into the mechanisms by which governments in different countries determine the agendas of

their corresponding parliaments It explores the three different ways that governments can shape legislative outcomes institutional partisan and positional to make an important contribution to legislative politics It will be of interest to students and scholars of comparative politics legislative studies parliamentary research governments coalition politics political economy and policy studies

Parliaments and Legislative Activity Martin Brunner, 2012-10-10 Martin Brunner aims at solving the puzzle of why opposition parties or government backbenchers propose legislation even though the chance to influence policy outcomes in this manner is almost nil He argues that instead of influencing policies directly most parliamentary bills serve different purposes They are used in order to signal own policy positions and to show alternatives to government policies Or they point at topics that rank high on the public agenda but low on the government agenda They can also be a means for individual Members of Parliament to build up an independent personal profile Using formal models and comparative empirical evidence from Belgium France Germany and the United Kingdom the author shows that parliamentary initiatives of opposition and backbenchers are not simply much ado about nothing but the result of vote seeking motivations

Morality Politics in a Secular Age Eva-Maria Euchner, 2019-05-02 Euchner's carefully researched and cogently argued study of morality politics in Europe adds an outstanding piece of research to the ever growing literature on religion and politics Its combination of quantitative and qualitative comparative analysis involving a novel data set and cross policy perspectives demonstrates persuasively the role of religion as a resource for political action even in secularized societies Michael Minkenberg Viadrina European University Germany Building upon the dichotomy between the secular and religious worlds of European morality politics Dr Euchner plumbs the empirical depths of four nations to unearth a compelling theoretical explanation for when value laden conflicts surface in parliaments with a strong secular religious party cleavage This singularly important volume belongs in the institutional libraries and bibliographic collections of every serious student of public policy analysis especially those of us who focus on morality policy Raymond Tatalovich Loyola University Chicago USA This book introduces a new theoretical framework from which to understand religion and morality politics in Europe This framework provides a first and rather provocative answer to the general debate on how religion influences policy making processes Specifically the book argues that religion is more a strategic resource for political parties than a fundamental normative doctrine shaping political parties policy making behavior in a systematic and coherent way The framework proposes a mechanism i.e. wedge issue competition that can be used to identify and explain the conditions under which issues related to religious values rise and fall in parliaments of the religious world in Europe and what consequences we may expect in terms of policy reforms

explain the ongoing dissatisfaction with Parliament and perennial calls for parliamentary reform It focuses on overarching analytical themes rather than exhaustive description It centres people over procedure and theory with strong emphasis given to dimensions of gender race and additional forms of diversity Arguing for a holistic and realistic understanding of Parliament that recognizes and accepts that Parliament evolves and adapts The Paradox of Parliament puts forward an important and novel interpretation of the many facets of Parliament in Canada **European Politics** Paul

relationship between parliament and government is fundamental to a political system In this volume a distinguished team of specialists explore that relationship and consider to what extent parliaments have the capacity to constrain governments Are there particular institutional features such as specialisation through committees that enhance their capacity to influence public policy Constitutionalism and the Rule of Law Maurice Adams,Anne Meuwese,Ernst Hirsch Ballin,2017-02-02 Rule

of law and constitutionalist ideals are understood by many if not most as necessary to create a just political order Defying the traditional division between normative and positive theoretical approaches this book explores how political reality on the one hand and constitutional ideals on the other mutually inform and influence each other Seventeen chapters from leading international scholars cover a diverse range of topics and case studies to test the hypothesis that the best normative theories including those regarding the role of constitutions constitutionalism and the rule of law conceive of the ideal and the real as mutually regulating Organizing Political Parties Susan E. Scarrow,Paul D. Webb,Thomas Poguntke,2017-06-23 Political

party organizations play large roles in democracies yet their organizations differ widely and their statutes change much more

frequently than constitutions or electoral laws How do these differences and these frequent changes affect the operation of democracy This book seeks to answer these questions by presenting a comprehensive overview of the state of party organization in nineteen contemporary democracies Using a unique new data collection the book s chapters test propositions about the reasons for variation and similarities across party organizations They find more evidence of within country similarity than of cross national patterns based on party ideology After exploring parties organizational differences the remaining chapters investigate the impact of these differences The volume considers a wide range of theories about how party organization may affect political life including the impact of party rules on the selection of female candidates the links between party decision processes and the stability of party programmes the connection between party finance sources and public trust in political parties and whether the strength of parties extra parliamentary organization affects the behaviour of their elected legislators Collectively these chapters help to advance comparative studies of elections and representation by inserting party institutions and party agency more firmly into the centre of such studies Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The series is edited by Emilie van Haute Professor of Political Science Universit libre de Bruxelles Ferdinand M ller Rommel Director of the Center for the Study of Democracy Leuphana University and Susan Scarrow Chair of the Department of Political Science University of Houston
