Dictionary Simon Hornblower, Antony Spawforth, Esther Eidinow, 2012-03-29 The revised third edition of the Oxford Classical Dictionary is the ultimate reference on the classical world containing over 6 200 entries The 2003 revision includes minor corrections and updates and all Latin and Greek words in the text are now translated into English Imagination of the Mind in Classical Athens Emily Clifford, Xavier Buxton, 2023-07-14 This book explores the imaginative processes at work in the artefacts of Classical Athens When ancient Athenians strove to grasp justice or war or death when they dreamt or deliberated how did they do it Did they think about what they were doing Did they imagine an imagining mind European histories of the imagination have often begun with thinkers like Plato and Aristotle By contrast this volume is premised upon the idea that imaginative activity and especially efforts to articulate it can take place in the absence of technical terminology In exploring an ancient culture of imagination mediated by art and literature the book scopes out the roots of later more explicit theoretical enquiry Chapters hone in on a range of visual and verbal artefacts from the Classical period Approaching the topic from different angles philosophical historical philological literary and art historical they also investigate how these artefacts stimulate affective sensory meditative in short imaginative encounters between imagining bodies and their world The Imagination of the Mind in Classical Athens offers a ground breaking reassessment of imagination in ancient Greek culture and thought it will be essential reading for those interested in not only philosophies of mind but also ancient Greek image text and culture more broadly Medicine and Philosophy in Classical Antiquity Philip I. van der Eijk, 2005-05-12 This work brings together Philip van der Eijk s previously published essays on the close connections that existed between medicine and philosophy throughout antiquity Medical authors such as the Hippocratic writers Diocles Galen Soranus and Caelius Aurelianus elaborated on philosophical methods such as causal explanation definition and division and applied key concepts such as the notion of nature to their understanding of the human body Similarly philosophers such as Plato and Aristotle were highly valued for their contributions to medicine This interaction was particularly striking in the study of the human soul in its relation to the body as illustrated by approaches to specific topics such as intellect sleep and dreams and diet and drugs With a detailed introduction surveying the subject as a whole and an essay on Aristotle s treatment of sleep this wide ranging and accessible collection is essential reading for the student of ancient philosophy and The Classical Review ,1910 This companion to the Classical Quarterly contains reviews of new work dealing science with the literatures and civilizations of ancient Greece and Rome Over 300 books are reviewed each year Selected Essays on Pre- and Early Modern Mathematical Practice Jens Høyrup, 2019-09-20 This book presents a broad selection of articles mainly published during the last two decades on a variety of topics within the history of mathematics mostly focusing on particular aspects of mathematical practice This book is of interest to and provides methodological inspiration for historians of science or mathematics and students of these disciplines The Works of Aristotle: Meteorologica; De mundo; De anima; Parva naturalia; De spiritu Aristotle,1923 *Philosophical Problems in Sense Perception: Testing the Limits of*

Aristotelianism David Bennett, Juhana Toivanen, 2020-12-15 This volume focuses on philosophical problems concerning sense perception in the history of philosophy It consists of thirteen essays that analyse the philosophical tradition originating in Aristotle's writings Each essay tackles a particular problem that tests the limits of Aristotle's theory of perception and develops it in new directions. The problems discussed range from simultaneous perception to causality in perception from the representational nature of sense objects to the role of conscious attention and from the physical mental divide to perception as quasi rational judgement The volume gives an equal footing to Greek Arabic and Latin philosophical traditions It makes a substantial contribution not just to the study of the Aristotelian analysis of sense perception but to its reception in the commentary tradition and beyond Thus the papers address developments in Alexander of Aphrodisias Themistius Avicenna John of Jandun Nicole Oresme and Sayf al Din al Amidi among others The result of this is a coherent collection that attacks a well defined topic from a wide range of perspectives and across philosophical traditions Topical Themes in Argumentation Theory Frans H. van Eemeren, Bart Garssen, 2012-05-05 Topical Themes in Argumentation Theory brings together twenty exploratory studies on important subjects of research in contemporary argumentation theory. The essays are based on papers that were presented at the 7th Conference of the International Society for the Study of Argumentation ISSA in Amsterdam in June 2010 They give an impression of the nature and the variety of the kind of research that has recently been carried out in the study of argumentation The volume starts with three essays that provide stimulating theoretical perspectives on argumentation Subsequently some views are explained on the intriguing topics of dissensus and deep disagreement After a discussion of three different approaches to the treatment of types of argumentation some classical themes from antique argumentation theory are revisited The new research area of visual argumentation is explored in the next part The volume concludes with three reports of experimental studies concerning argumentative discourse The volume starts with three essays that provide stimulating theoretical perspectives on argumentation Subsequently some views are explained on the intriguing topics of dissensus and deep disagreement After a discussion of three different approaches to the treatment of types of argumentation some classical themes from antique argumentation theory are revisited The new research area of visual argumentation is explored in the next part The volume concludes with three reports of experimental studies concerning argumentative discourse The volume starts with three essays that provide stimulating theoretical perspectives on argumentation Subsequently some views are explained on the intriguing topics of dissensus and deep disagreement After a discussion ofthree different approaches to the treatment of types of argumentation some classical themes from antique argumentation theory are revisited The new research area of visual argumentation is explored in the next part The volume concludes with three reports of experimental studies concerning argumentative discourse Harvard **Studies in Classical Philology** Harvard University. Peter W Rose The Text of Aristotle s De Motu Animalium by Martha C Nussbaum Symposium at Sea by W J Slater Emendations of Pseudo Quintilian's Longer Declamations by D R Shackleton Bailey Limes Arabicus by G W Bowersock and The Plancii of Perge and Diana Planciana by C P Jones Aristotle. On Youth and Old Age, Life and Death, and Respiration 1-6 Giouli Korobili,2022-06-21 This book is devoted to the last part of Aristotle's collection of short treatises known today as the Parva Naturalia i e the treatise On Youth and Old Age on Life and Death on Respiration In the three main sections of the book the author offers a translation a commentary and a thorough analysis of this work The author argues in favour of the unity of the work and contextualises its ideas within Aristotle's corpus and the medical tradition of his time After an Introduction to the nature of the work and its significance for the history of natural philosophy and science a new English translation follows along with a detailed commentary of Chapters 1 6 which combines philosophical discussion with philological observations The book includes four interpretive essays which tackle problems related to the whole treatise on a more philosophical basis including questions about the structure and unity of the work the organisation of the material Aristotle's methodological principles his aims and target audience as well as the relevance of his selected themes to the thematic agenda of some Hippocratic writings This book is of interest to students and researchers in Aristotle's psychophysiology and his views about the embodied mind as well as to anyone concerned with the history of natural philosophy and science more generally Aristotle on God's Life-Generating Power and on Pneuma as Its Vehicle Abraham P. Bos, 2018-02-01 In this deep rethinking of Aristotle's work Abraham P Bos argues that scholarship on Aristotle's philosophy has erred since antiquity in denying the connection between his theology and his doctrine of reproduction and life in the earthly sphere Beginning with an analysis of God's role in the Aristotelian system Bos explores how this relates to other elements of his philosophy especially to his theory of reproduction. The argument he develops is that in talking about the cosmos Aristotle rejected Plato's metaphor of artisanal production by a divine Demiurge in favor of a biotic metaphor based on the transmission of life in reproduction in which pneuma not breath as it is often interpreted but the life bearing spirit in animals and plants plays a key and sustaining role as the vital principle in all that lives In making this case he defends the authenticity of the treatises De Mundo and De Spiritu as Aristotle s and demonstrates Aristotle s works as a unified system that sharply and comprehensively refutes Plato s and in particular replaces Plato s doctrine of the soul with a theory in which the soul is clearly distinguished from the intellect Academic Theories of Generation in the Renaissance Linda Deer Richardson, 2018-01-17 This volume deals with philosophically grounded theories of animal generation as found in two different traditions one deriving primarily from Aristotelian natural philosophy and specifically from his Generation of Animals and another deriving from two related medical traditions the Hippocratic and the Galenic The book contains a classification and critique of works that touch on the history of embryology and animal generation written before 1980 It also contains translations of key sections of the works on which it is focused It looks at two different scholarly

communities the physicians medici and philosophers philosophi that share a set of textual resources and philosophical lineages as well as a shared problem explaining animal generation but that nevertheless have different concerns and commitments The book demonstrates how those working in these two traditions not only shared a common philosophical background in the arts curricula of the universities but were in constant intercourse with each other This book presents a test case of how scholarly communities differentiate themselves from each other through methods of argument empirical investigation and textual interpretations It is all the more interesting because the two communities under investigation have so much in common and yet in the end are distinct in a number of important ways The Possibility of Inquiry Gail Fine, 2014-03 Gail Fine presents the first full length study of Meno's Paradox a challenge to the possibility of inquiry that was first formulated in Plato's Meno She compares the responses of Plato Aristotle the Epicureans the Stoics and Sextus to the paradox and considers a series of key questions concerning the nature of knowledge and inquiry **Scholarly Community** at the Early University of Paris Spencer E. Young, 2014-04-24 This book explores the individuals and ideas involved in one of the most transformative periods in higher education s history Experiencing Immersion in Antiquity and Modernity Emma Cole, 2025-07-10 This book examines the links between experiencing immersion in antiquity and modernity Immersive experiences are big business within today s creative economy Forms range from immersive museum exhibitions theatrical performances art installations and experiences facilitated through virtual and augmented reality technologies Yet the idea of immersion is not new paintings sculpture and theatre have all been theorised historically in terms of illusion realism and immersion From antiquity to modernity there has been an interest in theorising the relationship between reality and virtual realities and in contemplating whether feeling present in an alternate universe is a sought after experience or something problematic and dangerous The chapters in this volume explore the warnings against immersion voiced by Plato and embodied in the figure of the Homeric sirens contrasted with the pro immersion perspectives championed by Aristotelian mimesis and embodied in the concept of enargeia The volume also examines the integration of the ancient world into immersive novels games museum exhibitions and theatrical performances Practice as Research contributions explore the benefits of this synergy from practitioner perspectives Contributors from diverse fields including classical reception studies art history game studies heritage studies and theatre studies approach the interplay between antiquity and modernity from varied standpoints Together they uncover previously unforeseen connections across disciplines and lay the groundwork for future research and additional classically inflected immersive experiences The English Traveler to Italy.
