## **Pascalian Meditations:**

*Pascalian Meditations* Pierre Bourdieu, 2000 A brilliant example of Bourdieu's unique ability to link sociological theory, historical information and philosophical thought Teaching Islamic Studies in the Age of ISIS, Islamophobia, and the Internet Kimberly Hall, Doaa Baumi, Manuela Ceballos, Benjamin Geer, Mouez Khalfaoui, Alfons H. Teipen, William Maynard Hutchins, Laila Hussein Moustafa, Nathan S. French, Todd Green, Sabahat F. Adil, Kecia Ali, Phil Dorroll, Lyndall Herman, Shehnaz Haqqani, 2019-01-24 A much needed volume and a must read for educators addressing a challenging topic in a challenging time. Choice. How can teachers introduce the subject of Islam when daily headlines and social media disinformation can prejudice students' perception of the subject? Should Islam be taught differently in secular universities than in colleges with a clear faith-based mission? What are strategies for discussing Islam and violence without perpetuating stereotypes? The contributors of *Teaching Islamic Studies in the Age of ISIS: Islamophobia and the Internet* address these challenges head-on and consider approaches to Islamic studies pedagogy, Islamophobia and violence, and suggestions for how to structure courses. These approaches acknowledge the particular challenges faced when teaching a topic that students might initially fear or distrust. Speaking from their own experience, they include examples of collaborative teaching models, reading and media suggestions, and ideas for group assignments that encourage deeper engagement and broader thinking. The contributors also share personal struggles when confronted with students, including Muslim students and parents who suspected the courses might have ulterior motives. In an age of stereotypes and misrepresentations of Islam, this book offers a range of means by which teachers can encourage students to thoughtfully engage with the topic of Islam. Abundant and useful references. Highly recommended. Choice. Morphing Intelligence Catherine Malabou, 2019-02-12 What is intelligence? The concept crosses and blurs the boundaries between natural and artificial, bridging the human brain and the cybernetic world of AI. In this book, the acclaimed philosopher Catherine Malabou ventures a new approach that emphasizes the intertwined, networked relationships among the biological, the technological, and the symbolic. Malabou traces the modern metamorphoses of intelligence, seeking to understand how neurobiological and neurotechnological advances have transformed our view. She considers three crucial developments: the notion of intelligence as an empirical, genetically based quality measurable by standardized tests; the shift to the epigenetic paradigm with its emphasis on neural plasticity; and the dawn of artificial intelligence with its potential to simulate, replicate, and ultimately surpass the workings of the brain. Malabou concludes that a dialogue between human and cybernetic intelligence offers the best, if not the only, means to build a democratic future. A strikingly original exploration of our changing notions of intelligence and the human and their far-reaching philosophical and political implications. *Morphing Intelligence* is an essential analysis of the porous border between symbolic and biological life at a time when once clear distinctions between mind and machine have become uncertain.

*Pierre Bourdieu's Political Economy of Being* Ghassan Hage, 2025-09-05 Ghassan Hage outlines what he calls Pierre

Bourdieu's political economy of being how society distributes and assigns values to ways of living and how people struggle to live a fulfilling life      *Practising the Symbolic* Sheena Jain, 2022-10-04 A powerful theory of the symbolic embedded within a remarkable and original theory of practice is a nodal aspect of the work of Pierre Bourdieu who was a leading social thinker of our times 1930-2002 Against the backdrop of the significance of symbolic practice in social life this book explains the intellectual warp and woof of his theory of the symbolic presents a brief excursus that explores its potential to illuminate social contexts other than those in which it was conceived examines its links with Bourdieu's role of social critic and public intellectual and engages critically with scholarly assessments of his contribution The book thus seeks to provide a comprehensive and in depth analysis and understanding of a central dimension of Bourdieu's work      *Affect Theory, Shame, and Christian Formation* Stephanie N. Arel, 2016-11-08 This book addresses the eclipse of shame in Christian theology by showing how shame emerges in Christian texts and practice in ways that can be neither assimilated into a discourse of guilt nor dissociated from embodiment Stephanie N. Arel argues that the traditional focus on guilt obscures shame by perpetuating the image of the lonely sinner in guilt Drawing on recent studies in affect and attachment theories to frame the theological analysis the text examines the theological anthropological writings of Augustine and Reinhold Niebuhr the interpretation of empathy by Edith Stein and moments of touch in Christian praxis Bringing the affective dynamics of shame to the forefront enables theologians and religious leaders to identify where shame emerges in language and human behavior The text expands work in trauma theory providing a multi-layered theological lens for engaging shame and accompanying suffering

Sociological Amnesia Alex Law, Eric Royal Lybeck, 2016-03-03 The history of sociology overwhelmingly focuses on the winners from the classical canon Marx Durkheim and Weber to today's most celebrated sociologists This book strikingly demonstrates that restricting sociology in this way impoverishes it as a form of historically reflexive knowledge and obscures the processes and struggles of sociology's own making as a form of disciplinary knowledge Sociological Amnesia focuses on singular contributions to sociology that were once considered central to the discipline but are today largely neglected Chapters explore the work of illustrious predecessors such as Raymond Aron Erich Fromm and G. D. H. Cole as well as examining exceptional cases of reputational revival as in the case of Norbert Elias or Gabriel Tarde Through understanding the obstacles of recognition faced by female sociologists like Viola Klein and Olive Schreiner and public intellectuals like Cornelius Castoriadis the volume considers the reasons why certain kinds of sociology are hailed as central to the discipline whilst others are forgotten In so doing the collection offers fresh insights into not only the work of individual sociologists but also into the discipline of sociology itself its trajectories forgotten promises and dead ends      *The Republican Workers Party* F.H. Buckley, 2018-09-04 The Republican Workers Party is the future of American presidential politics says F. H. Buckley It's a socially conservative but economically middle of the road party offering a way back to the land of opportunity where our children will have it better than we did That is the American Dream and Donald Trump's promise to restore it is what

brought him to the White House As a Trump speechwriter and key transition advisor Buckley has an inside view on what Make America Great Again really means how it represents a program to restore the American Dream as well as a defense of nationalism rooted in a sense of fraternity with all fellow Americans The call to greatness was a repudiation of the cruel hypocrisy of America s New Class the dominant 10 percent who deploy the language of egalitarianism while jealously guarding their own privileges The New Class talks like Jacobins but behaves like Bourbons Its members claim to support equality and social mobility but resist the very policies that promote mobility and equality a choice of good schools for everyone s children not just the well to do a sensible immigration policy that doesn t benefit elites at the expense of average Americans and regulatory reform to trim back the impediments that frustrate competitive enterprise It isn t complicated What s been lacking is political will This book pulls no punches in describing how liberals and conservatives had become indifferent to those left behind On the left identity politics offered an excuse to hate an ideological enemy On the right a tired conservatism defined itself through policies that callously ignored the welfare of the bottom 90 percent Trump told us that both Left and Right had betrayed the American people and his Republican Workers Party promises to renew the American Dream Buckley shows how it will do so

**Bourdieu** Tony Schirato, Mary Roberts, 2020-07-28 Throughout his career French philosopher Pierre Bourdieu sought to interrogate what he described as the social unconscious the means by which power is held and transmitted across generations Bourdieu s work has been hugely influential in disciplines across the social sciences and humanities for decades yet Schirato and Roberts argue that few scholars are using his work to its full potential Bourdieu s work is so wide ranging that commentary tends to focus on specific theoretical concepts he developed or his books on particular fields of inquiry However he continued to develop these concepts in his work across his whole career and much of the richness of his thinking is lost if this isn t taken into account Drawing on recently released lectures Schirato and Roberts offer a systematic account of Bourdieu s full body of work from his early research in Algiers to his last lectures in Paris They show how Bourdieu continued to develop his concepts of habitus field capital power and socio cultural reproduction well into his later years They also offer a nuanced reading of Bourdieu s thinking about education class language knowledge and culture beyond the individual books Bourdieu published on these topics This critical introduction to Bourdieu is essential reading for all Bourdieu scholars and for researchers and thinkers using Bourdieu s work in their own social and cultural analysis A terrific book which sets out a comprehensive overview of Bourdieu s oeuvre in a way that no other text I know has done Professor John Frow University of Sydney

[The Routledge Companion to Bourdieu's 'Distinction'](#) Philippe Coulangeon, Julien Duval, 2014-10-30 This edited collection explores the genesis of Bourdieu s classical book *Distinction* and its international career in contemporary Social Sciences It includes contributions from contemporary sociologists from diverse countries who question the theoretical legacy of this book in various fields and national contexts Invited authors review and exemplify current controversies concerning the theses promoted in *Distinction* in the sociology of culture

lifestyles social classes and stratification with a specific attention dedicated to the emerging forms of cultural capital and the logics of distinction that occur in relation to material consumption or bodily practices They also empirically illustrate the theoretical contribution of Distinction in relation with such notions as field or habitus which fruitfulness is emphasized in relation with some methodological innovations of the book In this respect a special focus is put on the emerging stream of distinction studies and on the opportunities offered by the geometrical data analysis of social spaces **Back to the Rough**

**Grounds of Praxis** Daniel Franklin Pilario, 2005 What is praxis How do we do theology from its perspective These are the main questions which this book seeks to answer As propaedeutic to theological reflection it surveys the notion of praxis in the philosophical sociological and anthropological traditions from Aristotle and Marx to contemporary theories It argues that Pierre Bourdieu's theory of practice achieves a critical synthesis of these different traditions making it a viable theological dialogue partner Bourdieu provides us with a praxeological theory to scrutinize the complexity of the social realm and an epistemological theory to understand the mystery of God's presence in these socio-historical conjunctures which serve as the privileged and only locus of His/Her revelation The author thus engages two theologians who take praxis/practice as central to their theological methods Clodovis Boff liberation theology and John Milbank radical orthodoxy From the perspective of its appropriated framework this work attempts to avoid the limitations as well as preserves the gains achieved by these two approaches as it also explores the rudiments of a theological method relevant to our post-Marxist and postmodern global contexts

**What Do Artists Know?** James Elkins, 2012-11-16 Each of the five volumes in the Stone Art Theory Institutes series and the seminars on which they are based brings together a range of scholars who are not always directly familiar with one another's work The outcome of each of these convergences is an extensive and unpredictable conversation on knotty and provocative issues about art This third volume in the series What Do Artists Know is about the education of artists The MFA degree is notoriously poorly conceptualized and now it is giving way to the PhD in art practice Meanwhile conversations on freshman courses in studio art continue to be bogged down by conflicting agendas This book is about the theories that underwrite art education at all levels the pertinent history of art education and the most promising current conceptualizations The contributors are Areti Adamopoulou Glenn Adamson Rina Arya Louisa Avgita Jan Baetens Su Baker Ciarán Benson Andrew Blackley Jeroen Boomgaard Brad Buckley William Conger John Conomos Christopher Csikszentmihályi Anders Dahlgren Jonathan Dronsfield Marta Edling Laurie Fendrich Michael Fotiadis Christopher Frayling Miguel González Virgen R E H Gordon Charles Green Vanalyne Green Barbara Jaffee Tom McGuirk William Marotti Robert Nelson Hakan Nilsson Saul Ostrow Daniel Palmer Peter Plagens Stephan Schmidt Wulffen Howard Singerman Henk Slager George Smith Martin Sjöberg Ann Sobiech Munson Roy Sorensen Bert Taken Hilde Van Gelder Frank Vigneron Janneke Wesseling Frances Whitehead Gary Willis and Yeung Yang Melancholy Politics Jean-Philippe Mathy, 2011 A study of the cultural politics of loss and mourning in France from 1978 to the present Focuses on national identity secularism Jacobin republicanism and

political cultural exceptionalism Provided by publisher      **The Obituary as Collective Memory** Bridget Fowler,2007-11-13  
The first serious academic study of obituaries this book focuses on how societies remember Bridget Fowler makes great use of the theories of Pierre Bordieu arguing that obituaries are one important component in society's collective memory This book the first of its kind will find a place on every serious sociology scholar's bookshelves      **Sex, Culture, and Justice** Clare Chambers,2018-05-17  
Autonomy is fundamental to liberalism But autonomous individuals often choose to do things that harm themselves or undermine their equality In particular women often choose to participate in practices of sexual inequality cosmetic surgery gendered patterns of work and childcare makeup restrictive clothing or the sexual subordination required by membership in certain religious groups In this book Clare Chambers argues that this predicament poses a fundamental challenge to many existing liberal and multicultural theories that dominate contemporary political philosophy Chambers argues that a theory of justice cannot ignore the influence of culture and the role it plays in shaping choices If cultures shape choices it is problematic to use those choices as the measure of the justice of the culture Drawing upon feminist critiques of gender inequality and poststructuralist theories of social construction she argues that we should accept some of the multicultural claims about the importance of culture in shaping our actions and identities but that we should reach the opposite normative conclusion to that of multiculturalists and many liberals Rather than using the idea of social construction to justify cultural respect or protection we should use it to ground a critical stance toward cultural norms The book presents radical proposals for state action to promote sexual and cultural justice      **Time, Duration and Change** Franz Bockrath,2023-11-22  
This book studies various perspectives in the history of European philosophy on the relationship between time and movement Ever since the pre Socratic thinker Zeno of Elea linked time and space to understand bodily movement his so called paradoxes of motion have remained unsolved One of his most important critics the French philosopher Henri Bergson criticized the usual connection between time and space and established a new way of understanding time as duration *durée* Whereas Zeno presented an objectivist understanding of time Bergson emphasized its subjectivist meaning Both contradictory positions seem incompatible referring to pure intellect Zeno on the one hand or pure sensation Bergson on the other Looking at Hegel's *Phenomenology* this book shows that the outer and inner consciousness of time became crucial to his principle of movement and change In his view time is an integral part of dialectical processes that are historically substantiated Hegel sought to subordinate pure concepts and ideas so that they would become indispensable moments of the self knowing spirit Cassirer appreciated the idealism of coming into being but rejected Hegel's concept of the absolute Instead he established his philosophy of symbolic forms in which the development of different perceptions and conceptions of time from situational affective experience to the mathematical system of relations determines the direction of the symbolic formation process In the end the sensitive concept of time is replaced by the relational concept of natural numbers in which all here and now experiences are embedded Finally Bourdieu attempts to reintegrate symbolic forms into

social processes The book reflects on the concepts mentioned here by discussing their pros and cons in order to shed more light on the relationship between time and movement in European thought Pierre Bourdieu and Literacy Education James Albright, Allan Luke, 2010-04-26 In this volume scholars from around the world focus on how a Bourdieusian stance can enable a powerful sociocultural and cultural analysis of literacy education theory and practice and serve as an effective tool in analyzing relations of hierarchy and domination Pierre Bourdieu and Literacy Education is intended for researchers practitioners and graduate students in literacy education sociology of education and curriculum theory and as a text for advanced courses in these areas Constructing Place Sarah Menin, 2004-02-24 This book is a cutting edge study examining the attitudes to both nature and the built environment of the designer the client and the society in which an intervention be it architecture landscape design or a piece of art is made The legacy of the Modernist view of nature and the environment is also addressed and the degree to which such ideas continue to impinge on contemporary interventions is assessed *The Racial Order* Mustafa Emirbayer, Matthew Desmond, 2024-05-31 Proceeding from the bold and provocative claim that there never has been a comprehensive and systematic theory of race Mustafa Emirbayer and Matthew Desmond set out to reformulate how we think about this most difficult of topics in American life In *The Racial Order* they draw on Bourdieu Durkheim and Dewey to present a new theoretical framework for race scholarship Animated by a deep and reflexive intelligence the book engages the large and important issues of social theory today and along the way offers piercing insights into how race actually works in America Emirbayer and Desmond set out to examine how the racial order is structured how it is reproduced and sometimes transformed and how it penetrates into the innermost reaches of our racialized selves They also consider how and toward what end the racial order might be reconstructed In the end this project is not merely about race it is a theoretical reconsideration of the fundamental problems of order agency power and social justice *The Racial Order* is a challenging work of social theory institutional and cultural analysis and normative inquiry **Essays on Ethics and Culture** Sabina Lovibond, 2022-10-17 These essays discuss various ontological and epistemological questions in moral philosophy drawing on ideas from Platonic Aristotelian ethics the later Wittgenstein and Iris Murdoch though without seeking to weave these into any unified system The general approach is realist or objectivist paying some attention to the role of imaginative literature especially the novel in ethical formation A common theme is the lived experience of the socially situated subject including our capacity for engagement with the values present in an inherited tradition or form of life Such engagement once raised to consciousness may contain elements both of affirmation and of cultural critique In the book as a whole the critical theme predominates with a certain emphasis on discourses of social disruption But it is always assumed that the right place to stand as an observer of the domain of value is within that domain and that moral critique will be immanent with respect to the culture addressed that is it will make do with just the conceptual and linguistic resources available to ordinary participants in moral political or aesthetic conversation
