Polynesian Navigation Jack Golson,1962 *Pacific Studies* ,1993 **A Hero for the Atomic Age** Axel Andersson,2010 Nomination for Best Foreign Film at the 2013 Academy Awards In English and many other languages the name Kon Tiki has become a byword for adventure and the exotic The journey of the Kon Tiki from Peru to Polynesia in 1947 became one of the founding myths of the postwar world In the voyage of six Scandinavians and a parrot on a balsa raft across the Pacific Ocean the classic journey of discovery was re invented for generations to come Kon Tiki spoke of heroism masculinity free spirited rebellion against scientific dogmatism and the promise of an attainable exotic world while it updated these mythological staples to fit the times After years of relentless media exploitation of the 101 day raft journey Heyerdahl emerged as the protagonist in a legend that helped to create a new postwar West A Hero for the Atomic Age tells the story of how Heyerdahl organized an expedition to sail a balsa raft from Callao in Peru to the Tuamotu Islands in French Polynesia

and explains how he turned this physical crossing into an epic narrative that became imbued with a universal appeal. The book also addresses for the first time the problematic nature of Heyerdahl's theory that a white culture-bearing race had initiated all the world's great civilizations.

Inventions of Teaching Brent Davis, Angus McMurtry, 2024-08-02

This updated edition of *Inventions of Teaching: A Genealogy* presents an examination of the many and varied metaphors of teaching in English. These metaphors serve as sites to excavate conflicting historical conceptual and philosophical influences that have contributed to modern teaching practices. Though the Eurocentric perspectives of the first edition remain a focus, they are placed in a broader context that acknowledges their role as the authors coin it: WEIRDness, i.e., western, educated, industrialized, rich, democratic nature. In this revised and expanded edition, these perspectives are accompanied by multiple case studies of non-Western and Indigenous educational traditions. Chapter discussions are organized as a genealogy around key conceptual bifurcations in thought rather than case-by-case analysis or a chronology. This structure allows the authors to examine the origins of distinctions that are often taken for granted, such as cognitivism vs. behaviorism or constructivism vs. positivism. The genealogy develops around breaks in opinion that gave or are giving rise to diverse interpretations of knowledge, learning, and teaching, highlighting historical moments in which vibrant new figurative understandings of teaching emerged. A new chapter has been added addressing the habits of interpretation needed to render the WEIRD world sensible alongside a much elaborated closing discussion intended to bring WEIRD inventions of teaching into sharper relief by contrasting them with non-WEIRD cultures and some of their approaches to teaching. *Inventions of Teaching: A Genealogy* is an informative text for senior undergraduate and graduate courses in curriculum studies and foundations of teaching. It is also relevant for students, faculty, and researchers across the field of education who want to explore the consequences of diversities of opinion, belief, and practice concerning teaching and closely related topics of learning, knowing, and formal education.
