Change(d) Agents Betty Achinstein,Rodney T. Ogawa,2011-06-10 This book examines both the promise and complexity of diversifying today s teaching profession Drawing from a 5 year study of 21 new teachers of colour working in urban hard to staff schools this book uncovers a systemic paradox that the teachers confront They are committed to improving educational opportunities for students of colour by acting as role models culturally linguistically responsive teachers and change agents The teaching profession encouraged such commitments and some teachers acted with support from individual organizational and community based sponsors However many of these new teachers work in schools that are culturally subtractive and have restrictive accountability policies that challenge their ability to perform cultural professional roles to which they are committed Many teachers internalize the contradiction resulting in their becoming changed agents within the educational system they sought to change This book is essential reading for educators leaders and policymakers
