Passion And Action:

Passion and Action Susan James, 1997 *Passion and Action* is an exploration of the role of the emotions in early modern thought Susan James offers fresh readings of a broad range of thinkers including such canonical figures as Hobbes Descartes Pascal and Locke

Passion and Action Susan James, 1997-10-16 *Passion and Action* explores the place of the emotions in seventeenth century understandings of the body and mind and the role they were held to play in reasoning and action Interest in the passions pervaded all areas of philosophical enquiry and was central to the theories of many major figures including Hobbes Descartes Malebranche Spinoza Pascal and Locke Yet little attention has been paid to this topic in studies of early modern thought Susan James surveys the inheritance of ancient and medieval doctrines about the passions then shows how these were incorporated into new philosophical theories in the course of the seventeenth century She examines the relation of the emotions to will knowledge understanding desire and power offering fresh analyses and interpretations of a broad range of texts by little known writers as well as canonical figures and establishing that a full understanding of these authors must take account of their discussions of our affective life *Passion and Action* also addresses current debates particularly those within feminist philosophy about the embodied character of thinking and the relation between emotion and knowledge This ground breaking study throws new light upon the shaping of our ideas about the mind and provides a historical context for burgeoning contemporary investigations of the emotions

Shakespeare to Richardson Benedict S. Robinson, 2021-05-27 *Passion's Fictions* traces the intimate links between literature and the sciences of mind and soul from the age of Shakespeare to the rise of the novel. It chronicles the emergence of new sciences of the passions between the sixteenth and eighteenth centuries and it argues that this history was shaped by rhetoric that contained the most extensively particularized discourse on the passions offering principles for moving and affecting the passions of others in concrete social scenes. This rhetoric of the passions centered on narrative as the instrument of a non-theoretical knowledge of the passions in their particularity predicated on an account of passion as an intimate relation between an impassioned mind and an impassioning world. Rhetoric offers a kind of externalist psychology formalized in the relation of passion to action and underwriting an account of narrative as a means of both moving passion and knowing it. This volume describes the psychology of the passions before the discipline of psychology tracing the influence of rhetoric on theories of the passions from Francis Bacon to Adam Smith and using that history to read literary works by Shakespeare, Milton, Haywood, Richardson and others. Narrative offers a means of knowing and moving the passions by tracing them to the events and objects that generate them; the history of narrative practices is thus a key part of the history of the psychology of the passions at a critical moment in its development. *Handbook of American Romanticism* Philipp Löffler, Clemens Spahr, Jan Stievermann, 2021-07-05 The *Handbook of American Romanticism* presents a comprehensive survey of the various schools, authors and works that constituted antebellum literature in the United States. The volume is designed to feature a selection of representative case studies and to assess them within two complementary frameworks: the most relevant historical, political and institutional contexts of the antebellum decades and the consequent re-appropriations of the Romantic period by academic literary criticism in the twentieth and early twenty-first centuries. [Kant and the Role of Pleasure in Moral Action](#) Iain P. D. Morrisson, 2008 Kant scholars since the early nineteenth century have disagreed about how to interpret his theory of moral motivation. Kant tells us that the feeling of respect is the incentive to moral action but he is notoriously ambiguous on the question of what exactly this means. In *Kant and the Role of Pleasure in Moral Action* Iain Morrisson offers a new view on Kant's theory of moral action. In a clear, straightforward style Morrisson responds to the ongoing interpretive stalemate by taking an original approach to the problem. Whereas previous commentators have attempted to understand Kant's feeling of respect by studying the relevant textual evidence in isolation, Morrisson illuminates this evidence by determining what Kant's more general theory of action commits him to regarding moral action. After looking at how Kant's treatment of desire and feeling can be reconciled with his famous account of free, maxim-based action, Morrisson argues that respect moves us to moral action in a way that is structurally parallel to the way in which nonmoral pleasure motivates nonmoral action. In reconstructing a unified theory of action in Kant, Morrisson integrates a number of distinct elements in his practical philosophy. *Kant and the Role of Pleasure in Moral Action* is part of a new wave of interest in Kant's anthropological and psychological works. **British Moralists** Sir Lewis Amherst Selby-Bigge, 1897 *The*
