Political Passions Rachel Judith Weil, 1999 Ideas about marriage gender and the family were central to political debate in late Stuart England Newly available in paperback this book shows how political argument became an arena in which the proper relations between men and women parents and children public and private were defined and contested Using sources that range from high political theory to scurrilous lampoons she considers public debates about succession resistance and divorce Weil examines the allegedly fraudulent birth of the Prince of Wales in 1688 the uses to which Williamite propagandists put the image of the paradoxically sovereign but obedient Mary II anxieties about the influence of bedchamber women on Queen Anne the political self image of the notorious Duchess of Marlborough the relationship of feminism and Tory ideology in the polemical writings of Mary Astell and the scandal novels of Delariviere Manley Solidly grounded in current historical scholarship but written in an engaging

manner accessible to non specialists this book will interest students of literature gender studies political culture and political theory as well as historians

Versailles Mirrored Robert Wellington, 2025-09-04 Why has Louis XIV's Palace of Versailles defining symbol of hedonistic opulence in 17th century France and synonymous with the notion of the divine right of kings continued to shape the aesthetics of cultural capital in the centuries since his death In *Versailles Mirrored* Robert Wellington tracks this enduring fascination with the Sun King's palace through eight case studies spanning the 17th to 21st centuries The book demonstrates how the extravagant palace style began as a symbol of the state in the 17th century how it was adopted by the nouveau riche to show off their financial success in the 19th century and remarkably how that palace look returned to play a role in statecraft in the hands of US President Donald Trump Wellington links the aristocratic architectural traditions of France England and Germany to North America through the lens of Versailles French architecture and the decorative arts Opening with a brief overview of the history of Versailles and the political and cultural motivations of its creation subsequent chapters address aristocratic buildings in France and Germany built by the Sun King's contemporaries historicism in the 19th century in Britain Germany and America and the present day with Trump's buildings and Chateau Louis XIV known as the world's most expensive home purchased by the Crown Prince of Saudi Arabia In uncovering the motivations of those patrons the book ultimately reveals why Versailles remains a powerful point of reference for those who wish to flaunt their social cultural and political capital

Women of Quality Ingrid H. Tague, 2002 An examination of the interaction between ideology and experience in the lives of English women during a period of great social and intellectual change Focusing on the complex relationship between discourse and experience *Women of Quality* examines the role of gender in aristocratic women's daily lives during a period of significant cultural change In the years following the Glorious Revolution didactic writers and other social critics responded to a perceived crisis of gender relations by creating a new discourse of natural feminine behavior in opposition to the luxury and decadence of fashionable women Modern scholars have often portrayed this agenda as representing the rise of a middle class ideology but Ingrid Tague argues that the new rhetoric held enormous appeal for those women who would appear to be its greatest targets wealthy fashionable women of

quality Using the correspondence and diaries of these women Tague traces the ways in which they adopted adapted and exploited ideals of femininity In their hands feminine values could become powerful tools that enabled them to compete for status and reputation Ironically by identifying femininity with private trivial concerns these ideals created unique opportunities for elite women Female participation in informal social and political activities placed women at the heart of aristocratic power in the early eighteenth century even as they employed the language of wifely subordination and domesticity Ingrid Tague is Assistant Professor of History at the University of Denver
