## Passionate Cause:

*The Psychology of Passion* Dr Robert J. Vallerand, 2015-05-01 Winner of the 2017 APA William James Book Award The concept of passion is one we regularly use to describe our interests and yet there is no broad theory that can explain the development and consequences of passion for activities across people's lives In *The Psychology of Passion* Robert J Vallerand presents the first such theory providing a complete presentation of the Dualistic Model of Passion and the empirical evidence that supports it Vallerand conceives of two types of passion harmonious passion which remains under the person's control and obsessive passion which controls the person While the first typically leads to adaptive behaviors the obsessive form of passion leads to less adaptive and at times maladaptive behaviors Vallerand highlights the effects of these two types of passion on a number of psychological phenomena such as cognition emotions performance relationships aggression and violence He also discusses the development of passion and reviews a range of literature on passion for activities

*Descartes and the Passionate Mind* Deborah J. Brown, 2006-06-22 An important and original reading of Descartes account of mind body unity and his theory of mind **The Theosophical Quarterly** ,1927 **Magic** ,2021-05-01 Words are means by which people communicate and the words can constitute a language To communicate you have to have an understanding of the words you use and that is where the problem arises The meanings of most of the words we use were learned in context with other words and from this we assume that we know the meaning of a word When you do this and your understanding of a word is the same as its real meaning no problem arises However when what you assume the meaning of a word to be does not agree with the true meaning of the word then misunderstanding is the result It is most rewarding to understand the true meaning of words The best sources for obtaining this information are dictionaries encyclopaedias and dictionaries in other languages As an example the word principle is often used Have you ever looked it up in a dictionary to find out if your understanding of this word is the same as what it really means Many times of course your understanding is correct but be certain to avoid misunderstanding When you read this book your understanding of all the words are of the utmost importance The meaning or meanings of the word principle include 1 Chief 2 Beginning 3 the Ultimate Source 4 Origin 5 The Law of nature by which a thing operates 6 An Essential Element Many people in the old days believed in spirits demons angels and so on Even today some believe in this while others do not Primitive civilizations believed that thunder storms and rain were caused by the gods One question however always remains unanswered In a laboratory experiment ingredients have to be combined to achieve certain results In a laboratory this is done by people Who does it in nature These questions and more are all addressed by Karl von Eckartshausen 1752 1803 because universal truths and principles are timeless and do not change from century to century Words are means by which people communicate and the words can constitute a language To communicate you have to have an understanding of the words you use and that is where the problem arises The meanings of most of the words we use were learned in context with other words and from this we assume that we know the meaning of a

word When you do this and your understanding of a word is the same as its real meaning no problem arises However when what you assume the meaning of a word to be does not agree with the true meaning of the word then misunderstanding is the result It is most rewarding to understand the true meaning of words The best sources for obtaining this information are dictionaries encyclopaedias and dictionaries in other languages As an example the word principle is often used Have you ever looked it up in a dictionary to find out if your understanding of this word is the same as what it really means Many times of course your understanding is correct but be certain to avoid misunderstanding When you read this book your understanding of all the words are of the utmost importance The meaning or meanings of the word principle include 1 Chief 2 Beginning 3 the Ultimate Source 4 Origin 5 The Law of nature by which a thing operates 6 An Essential Element Many people in the old days believed in spirits demons angels and so on Even today some believe in this while others do not Primitive civilizations believed that thunder storms and rain were caused by the gods One question however always remains unanswered In a laboratory experiment ingredients have to be combined to achieve certain results In a laboratory this is done by people Who does it in nature These questions and more are all addressed by Karl von Eckartshausen 1752 1803 because universal truths and principles are timeless and do not change from century to century
