Passion, Politics, and Philosophie Leonore Loft, 2001-10-30 Jacques Pierre Brissot was among the major architects of the French Revolution yet history has vilified and then dismissed him His early intellectual development was strongly influenced by Enlightenment ideas and aspirations However his own remarkable construct of a just democratic society universal suffrage and a renewed humanity living in moral and political freedom foreshadowed many present day ideologies The prevailing view of Brissot has pigeonholed him as Brissot the police spy a label difficult to remove Although this contention has been disputed at some length Loft presents an alternative view of the forces that shaped Brissot's social and political activism Tracing the gradual evolution of his ideology from its earliest stages reveals that he did not suddenly become a radical in the mid 1780s An open objective and thorough evaluation of Brissot's work uncovers the roots of his lifelong commitment to reformist egalitarian and democratic ideals To understand Brissot the man and his work one must assess the cultural intellectual and political influences that surrounded him Loft offers the necessary fusion of text and context providing a serious reconsideration of Brissot and his contributions to the history of human rights Scholars and other researchers of the French Revolution and European political thought will find this study of particular value

Derrida, Badiou and the Formal Imperative Christopher Norris, 2012-08-02 In this path breaking study Christopher Norris proposes a transformed understanding of the much exaggerated differences between analytic and continental philosophy While keeping the analytic tradition squarely in view his book focuses on the work of Jacques Derrida and Alain Badiou two of the most original and significant figures in the recent history of ideas Norris argues

that these thinkers have decisively reconfigured the terrain of contemporary philosophy and between them pointed a way beyond some of those seemingly intractable issues that have polarised debate on both sides of the notional rift between the analytic and continental traditions In particular his book sets out to show against the received analytic wisdom that continental philosophy has its own analytic resources and is capable of bringing some much needed fresh insight to bear on problems in philosophy of language logic and mathematics Norris provides not only a unique comparative account of Derrida's and Badiou's work but also a remarkably wide ranging assessment of their joint contribution to philosophy's current if widely resisted potential for self transformation *Citizen Politics In Post-industrial Societies* Terry Nichols

Clark, 2018-03-14 The past several decades have seen profound changes in the political landscapes of advanced industrial societies This volume assesses key political developments and links them to underlying socioeconomic and cultural forces These forces include the growth of a well educated middle class the moderating of bipolar class divisions between wealthy capitalists and struggling workers and the accelerated rise of new media technologies especially television as potent tools shaping the terms of public discussion Related political transformations include the spread of new social movements on feminist environmental and civil liberties issues economic concerns focusing more on growth taxes and middle class programs than on redistribution the fracturing of core left and right political ideologies and the growing centrality of electronic media as carriers of political opinions and rhetoric The past several decades have seen profound changes in the political landscapes of advanced industrial societies This volume assesses key political developments and links them to underlying socioeconomic and cultural forces These forces include the growth of a well educated middle class the moderating of bipolar class divisions between wealthy capitalists and struggling workers and the accelerated rise of new media technologies especially television as potent tools shaping the terms of public discussion Related political transformations include the spread of new social movements on feminist environmental and civil liberties issues economic concerns focusing more on growth taxes and middle class programs than on redistribution the fracturing of core left and right political ideologies and the growing centrality of electronic media as carriers of political opinions and rhetoric In their introduction Terry Clark and Michael Rempel pull together many seemingly disparate political changes to construct a clear synthetic framework identifying eight core components of postindustrial politics Part Two examines shifts in underlying cultural values It features a lively exchange between different contributors over whether apolitical materialistic values have risen or declined since the 1960s Part Three offers an in depth look at the political views and party allegiances of the growing middle classes and Part Four examines some of today's most divisive issues Although primarily adopting a cross national perspective *Citizen Politics in Post Industrial Societies* includes several case studies of politics in the United States and one in Japan Unique in its synthetic vision this volume will stimulate and challenge readers from across the political and theoretical spectrum *The Politics of History* Arthur H. Shaffer, 2011-12-31 This is an analysis of the American

Revolutionary generation's attempt to create a national history that would justify the Revolution and develop a sense of nationhood Shaffer pursues a number of themes and establishes a connection between the historians' republican ideology, political concerns and outlook and the precise ways in which they interpreted American history. He also includes an analysis of their background, education, profession, political persuasion, personal ambitions and circumstances and attitudes toward the problem of union during the 1780s. The writings here offer unusual insights into the mind of the Revolutionary generation. The histories produced during the early national period represent the beginnings of a genre of writing new to America, one characterized by the subjugation of history to the service of nationalism. It is this element—nationalism—that gave this history its flavor, made possible its achievement, saddled it with difficulties and although unintentionally produced a tone and emphasis different from that of the Enlightenment. The contribution of the Revolutionary generation of historians to the public identity represents an important aspect of the intellectual history of the early national period. With all their frequent vagueness and imprecision of formulation, almost incantatory repetitiousness and patriotic sentimentality, the works of the first national generation of historians comprise a revealing effort to come to grips with the meaning of the Revolution and nationhood. This striving charted much of the course that American historiography was to travel thereafter.

An Introduction to English Politics John Mackinnon Robertson, 1900 **A Passion for Society** Iain Wilkinson, Arthur Kleinman, 2016-01-26 What does human suffering mean for society? And how has this meaning changed from the past to the present? In what ways does the problem of suffering serve to inspire us to care for others? How does our response to suffering reveal our moral and social conditions? In this trenchant work, Arthur Kleinman, a renowned figure in medical anthropology, and Iain Wilkinson, an award-winning sociologist, team up to offer some answers to these profound questions. *A Passion for Society* investigates the historical development and current state of social science with a focus on how this development has been shaped in response to problems of social suffering. Following a line of criticism offered by key social theorists and cultural commentators who themselves were unhappy with the professionalization of social science, Wilkinson and Kleinman provide a critical commentary on how studies of society have moved from an original concern with social suffering and its amelioration to dispassionate inquiries. The authors demonstrate how social action through caring for others is revitalizing and remaking the discipline of social science and they examine the potential for achieving greater understanding through a moral commitment to the practice of care for others. In this deeply considered work, Wilkinson and Kleinman argue for an engaged social science that connects critical thought with social action that seeks to learn through caregiving and that operates with a commitment to establish and sustain humane forms of society.
