Passions Domain:

The Vehement Passions Philip Fisher, 2009-01-10 Breaking off the ordinary flow of experience the passions create a state of exception In their suddenness and intensity they map a personal world fix and qualify our attention and impel our actions Outraged anger drives us to write laws that will later be enforced by impersonal justice Intense grief at the death of someone in our life discloses the contours of that life to us Wonder spurs scientific inquiry The strong current of Western thought that idealizes a dispassionate world has ostracized the passions as quaint even dangerous Intense states have come to be seen as symptoms of pathology A fondness for irony along with our civic ideal of tolerance lead us to prefer the diluted emotional life of feelings and moods Demonstrating enormous intellectual originality and generosity Philip Fisher meditates on whether this victory is permanent and how it might diminish us From Aristotle to Hume to contemporary biology Fisher finds evidence that the passions have defined a core of human nature no less important than reason or desire Traversing the Iliad King Lear Moby Dick and other great works he discerns the properties of the high spirited states we call the passions Are vehement states compatible with a culture that values private selectively shared experiences How do passions differ from emotions Does anger have an opposite Do the passions give scale shape and significance to our experience of time Is a person incapable of anger more dangerous than someone who is irascible In reintroducing us to our own vehemence Fisher reminds us that it is only through our strongest passions that we feel the contours of injustice mortality loss and knowledge It is only through our personal worlds that we can know the world Speaking the Truth about Oneself Michel Foucault, 2021-10-07 Now in paperback this collection of Foucault's lectures traces the historical formation and contemporary significance of the hermeneutics of the self Just before the summer of 1982 French philosopher Michel Foucault gave a series of lectures at Victoria University in Toronto In these lectures which were part of his project of writing a genealogy of the modern subject he is concerned with the care and cultivation of the self a theme that becomes central to the second third and fourth volumes of his History of Sexuality Foucault had always been interested in the question of how constellations of knowledge and power produce and shape subjects and in the last phase of his life he became especially interested not only in how subjects are formed by these forces but in how they ethically constitute themselves In this lecture series and accompanying seminar Foucault focuses on antiquity starting with classical Greece the early Roman empire and concluding with Christian monasticism in the fourth and fifth centuries AD Foucault traces the development of a new kind of verbal practice speaking the truth about oneself in which the subject increasingly comes to be defined by its inner thoughts and desires He deemed this new form of hermeneutical subjectivity important not just for historical reasons but also due to its enduring significance in modern society *Civil Passions* Sharon R. Krause, 2013-12-08 In this book Sharon Krause argues that moral and political deliberation must incorporate passions even as she insists on the value of impartiality Her work provides a systematic account of how passions can generate an impartial standpoint that yields binding and compelling

conclusions in politics *Passion and Entrepreneurship* Enrico Baraldi, Simone Guercini, Marcus Lindahl, Andrea Perna, 2020-08-31 Providing new perspectives on the interface between passion and entrepreneurship this book recognizes that entrepreneurship is not just based on the search for profit. Instead, the entrepreneurial experience incorporates more complex processes often based on less rational behavior motivated by reasons other than revenue. Passion refers both to emotional elements that may fuel an entrepreneurial effort as well as something that feeds the business. The book challenges established views and shows the complexity of the link between passion and entrepreneurship. The authors discuss the main implications for businesses and explore how passion at the individual and community level influences entrepreneurial efforts. Offering case studies from multiple sectors alongside conceptual frameworks, this edited volume is a useful tool for scholars, practitioners, and policymakers working on entrepreneurship.

Thinking about the Emotions Alix Cohen, Robert Stern, 2017-05-26 Philosophical reflection on the emotions has a long history stretching back to classical Greek thought, even though at times philosophers have marginalized or denigrated them in favour of reason. Fourteen leading philosophers here offer a broad survey of the development of our understanding of the emotions. The thinkers they discuss include Aristotle, Aquinas, Ockham, Descartes, Malebranche, Spinoza, Hobbes, Hume, Shaftesbury, Hutcheson, Kant, Schiller, Schopenhauer, Nietzsche, James, Brentano, Stumpf, Scheler, Heidegger, and Sartre. Central issues include the taxonomy of the emotions, the distinction between emotions, passions, feelings, and moods, the relation between the emotions and reason, the relationship between the self and the emotions. At a metaphilosophical level, the collection also raises issues about the value of historical study of the discipline and what light it can shed on contemporary concerns. *Thinking about the Emotions* is a fascinating and illuminating collective study of how philosophers have grappled with this most intriguing part of our nature as beings who feel as well as think and act.

Passion for Work Robert J. Vallerand, Nathalie Houliort, 2019 This volume provides a comprehensive understanding of passion for work by addressing the origin of the concept and its theoretical issues: how can passion for work be developed? what are the consequences to be expected at the individual and organizational levels and how can passion for work shed new light on contemporary issues in the workplace. *R. S. Peters* Stefaan E. Cuypers, Christopher Martin, 2014-10-23 What does it mean to say that someone is an educated person? How do we know what is worth including in a school curriculum? Is a good moral education about developing good habits or critical thinking? What role does the development of knowledge and understanding play in living a good life? These are all questions that were robustly taken up by the philosopher of education R. S. Peters. In an era of immense reform and confusion about the values, aims, and purposes of education, Peters developed a clear and nuanced account of what education is really about and how educational policy and practice can make good on its promise. This text undertakes a careful and accessible reconstruction of the major themes of Peters' thought in order to demonstrate the continuing relevance of his project both for educational researchers and teachers and student teachers seeking to better understand the nature and scope of their work and study.

Philosophy and the Passions Michel Meyer, Robert F. Barsky, 2000 The subject of the passions has always haunted Western philosophy and more often than not aroused harsh judgments For the passions represent a force of excess and lawlessness in humanity that produces troubling confusing paradoxes In this book noted European philosopher Michel Meyer offers a wide ranging exegesis the first of its kind that systematically retraces the history of philosophic conceptions of the passions in the work of such thinkers as Plato Aristotle Augustine Spinoza Descartes Hobbes Rousseau Kant and Freud The great ruptures that led to passion's condemnation as sin and to its romantic exultation as the truth of existence are meticulously registered and the logic governing them astutely explicated Meyer thus provides new insight into an age old dilemma Does passion torture people because it blinds them or on the contrary does it permit them to apprehend who and what we really are
