**Microwave Engineering** Gérard Barué, 2008-07-23 Everything readers need to implement and support a wireless point to point communications environment In order to cope with the tremendous explosion of the telecommunications market the field of wireless communications has greatly expanded in the past fifty years especially in the domains of microwave radio systems including line of sight satellites and tropospheric scatter Now Microwave Engineering Land Space Radio communications answers the growing worldwide demand for an authoritative book on this important and emerging subject area In five succinct chapters the book introduces students and practicing engineers to the main propagation phenomena that are encountered and that must be considered in the design and planning for any given system type and frequency of operation Electromagnetic wave propagation An introduction to the fundamental theory of radiation and propagation of electromagnetic waves polarization antenna properties free space attenuation atmospheric refractivity diffraction reflection multipath and scattering mechanisms hydrometeor effects and probability distributions Principles of digital communication systems Modulation techniques signal processing error probability spectral characteristics spectrum efficiency thermal noise intermodulation jamming and interference Microwave line of sight systems Path profile flat fading and frequency selective fading interferometric method for space and frequency diversity techniques International Standards and ITU Recommendations optimization of the frequency plan resource link budget quality reliability and availability Microwave transhorizon systems Design of beyond the horizon communication systems properties of scattering and diffraction modes multipath statistical relations long term and short term field strength variations quality of service optimization of antenna alignment and experimental analysis of various diversity and combining methods Satellite communications Design of satellite communications systems orbital parameters Earth satellite geometry uplink and downlink budgets for both space and Earth segments and total system noise temperature Microwave Engineering Land Space Radiocommunications is suitable for engineers involved in wireless telecommunications as well as for students and members of various seminars and workshops

**Microwave Line of Sight Link Engineering** Pablo Angueira, Juan Romo, 2012-07-25 A comprehensive guide to the design implementation and operation of line of sight microwave link systems The microwave Line of Sight LOS transport network of any cellular operator requires at least as much planning effort as the cellular infrastructure itself The knowledge behind this design has been kept private by most companies and has not been easy to find Microwave Line of Sight Link Engineering solves this dilemma It provides the latest revisions to ITU reports and recommendations which are not only key

to successful design but have changed dramatically in recent years These include the methodologies related to quality criteria which the authors address and explain in depth Combining relevant theory with practical recommendations for such critical planning decisions as frequency band selection radio channel arrangements site selection antenna installation and equipment choice this one stop primer Describes the procedure for designing a frequency plan and a channel arrangement structure according to ITU current standards illustrated with specific application examples Offers analytical examples that illustrate the specifics of calculations and provide order of magnitude for parameters and design factors Presents case studies that describe real life projects putting together the puzzle pieces necessary when facing a real design created from scratch Microwave Line of Sight Link Engineering is an indispensable resource for radio engineers who need to understand international standards associated with LOS microwave links It is also extremely valuable for students approaching the topic for the first time
