Principles and Practices of Teaching English as an International Language Aya Matsuda, 2012 This book critically examines current ELT practices vis vis the use of English as an international lingua franca It bridges the gap between theoretical discussion and the practical concerns of teaching English as an international language and presents diverse approaches for preparing competent users of English in international contexts

Nonformal Education and Civil Society in Japan Kaori H. Okano, 2015-09-16 Nonformal Education and Civil Society in Japan critically examines an aspect of education that has received little attention to date intentional teaching and learning activities that occur outside formal schooling In the last two decades nonformal education has rapidly increased in extent and significance This is because individual needs for education have become so diverse and rapidly changing that formal education alone is unable to satisfy them Increasingly diverse demands on education resulted from a combination of transnational migration heightened human rights awareness the aging population and competition in the globalised labour market Some in the private sector saw this situation as a business opportunity Others in the civil society volunteered to assist the vulnerable The rise in nonformal education has also been facilitated by national policy developments since the 1990s Drawing on case studies this book illuminates a diverse range of nonformal education activities and suggests that the nature of the relationship between nonformal education and mainstream schooling has changed Not only have the two sectors become more interdependent but the formal education sector increasingly acknowledges nonformal education's important and necessary roles These changes signal a significant departure from the past in the overall functioning of Japanese education The case studies include neighbourhood homework clubs for migrant children community based literacy classes after school care programs sport clubs alternative schools for long term absent students schools for foreigners training in intercultural competence at universities and corporations k minkan community halls and lifelong learning for the seniors This book will appeal to both scholars of Japanese Studies Asian Studies and those of comparative education and sociology anthropology of education

The Value of English in Global Mobility and Higher Education Manuela Vida-Mannl, 2021-12-16 This book offers a unique insight into the dynamics of the English language in higher education in Cyprus through the lens of

universities situated on both sides of its geopolitical division. It takes an original perspective on value in the context of the sociolinguistics and political economy of English as a global language and as an apparent commodified entity. The problematic issues of value as they apply to language are dealt with from Marxist and Bourdieusean perspectives. The book also offers a helpful critique of the claims of alternative paradigms of English expansion such as ELF and their shortcomings in respect of the concept of value. Manuela Vida Mannl puts forth a critique of the marketization of English and the complicity of higher education in the reproduction of linguistic hierarchies and social inequalities in Cyprus and by implication more generally. She presents a conception of English as a marketable attribute that does not necessarily require competence which points to the ongoing imbrication of English in the reproduction of global structural and social inequality as it exposes the myth of class advancement through English. Building on an extensive study based on 205 questionnaires and 25 subsequent in depth ethnographic interviews and by focusing on the value of English within the unique context of divided Cyprus, this book uncovers an intriguing perspective on the neoliberal role and significance of the English language in our globalized world.

Global Student Mobility in the Asia Pacific Peter Kell, Gillian Vogl, 2010-02-19 Over 2.7m students study in a country other than their own. Most of those students come from the Asia Pacific region and undertake study in universities in the developed world. This trend is predicted to grow exponentially but features many dilemmas. In the post 9/11 global environment international students experience hostility and harassment as well as ambivalence about their value to the academy. Some live an uncertain life of poverty and alienation. Many also struggle to come to terms with living and studying in a foreign land where there are concerns about international students eroding academic standards, having poor English language proficiency and being unable to integrate and contribute to their new communities. But some also seek to make new homes in their host countries. The contributions in this book explore the complex and diverse aspects of transnational education and propose some pragmatic approaches to these dilemmas. These contributions explore new ways of looking at the phenomena of international students, their social and cultural needs as well as the challenges for teaching and learning, research supervision and English language in the academy. The book presents case studies and documents initiatives that are positive responses to the dilemmas of global student mobility.

RELC Journal Regional English Language Centre,1992 *English as a Lingua Franca in the International University*

Jennifer Jenkins,2013-08-15 In this book Jennifer Jenkins one of the leading proponents of English as a Lingua Franca explores current academic English language policy in higher education around the world Universities around the world are increasingly presenting themselves as international but their English language policies do not necessarily reflect this even as the diversity of their student bodies grows While there have been a number of attempts to explore the implications of this diversity from a cultural perspective little has been said from the linguistic point of view and in particular about the implications for what kind s of English are appropriate for English lingua franca communication in international higher education Throughout the book Jenkins considers the policies of English language universities in terms of the language attitudes and ideologies of university management and staff globally and of international students in a UK setting The book concludes by considering the implications for current policies and practices and what is needed in order for universities to bring themselves in line linguistically with the international status they claim English as a Lingua Franca in the International University is an essential read for researchers and postgraduate students working in the areas of Global Englishes English as a Lingua Franca and English for Academic Purposes
