*Identifying with Nationality* Will Hanley,2017-04-04 Nationality is the most important legal mechanism sorting and classifying the world s population today An individual s place of birth or naturalization determines where he or she can and cannot be and what he or she can and cannot do Although this system may appear universal even natural Will Hanley shows that it arose just a century ago In *Identifying with Nationality* he uses the Mediterranean city of Alexandria to develop a genealogy of the nation and the formation of the modern national subject Alexandria in 1880 was an immigrant boomtown ruled by dozens of overlapping regimes On its streets and in its police stations and courtrooms people were identified by name occupation place of origin sect physical description and other attributes Yet by 1914 before nationalist calls for independence and decolonization had become widespread nationality had become the defining category of identification and

nationality laws came to govern Alexandria's population. Identifying with Nationality traces the advent of modern citizenship to multinational transimperial settings such as turn of the century colonial Alexandria where ordinary people abandoned old identifiers and grasped nationality as the best means to access the protections promised by expanding states. The result was a system that continues to define and divide people through status mobility and residency.
