Further, it extols the virtues of in silico for bioinformatical predictions as it helps wet lab biologists reduce time for experiments. Also, it describes the intricacies of bioinformatics and its usefulness to wet based biologists and other cross disciplinarians. The book lists out 10 reasons for taking up bioinformatics as a career and includes insights from global experts on the domain. This book presents the stories of educators who, through digital storytelling, inspire students from diverse communities to construct their empowering digital narratives. Educators from a wide range of disciplines present innovative case studies of teaching digital storytelling through the lens of personal narratives, metaliteracy, and information literacy.
