Past Present And Future Ancient World Studies In Australia:

Out Here Down Under E. A. Judge, 2023-04-24 *Out Here Down Under* is a collection of documents and papers illuminating the development and character of ancient history as a discipline in the Antipodes. It considers especially the distinctive and extraordinarily popular program championed by E. A. Judge of studying classical and biblical corpora together under one discipline with an emphasis on the interpretation of documentary sources. In twenty chapters, this volume considers such issues as the relationship between British and Antipodean scholarship, the story and legacy of Antipodean scholars of the ancient world, the nature and ideology of ancient history programs at schools and universities, especially in NSW and at Macquarie, the interaction between biblical and classical disciplines, and the function of history in contemporary Australia. These texts, mostly written by Judge himself throughout his career, appear here with new introductory notes outlining their historical significance for the discipline and Judge's own practice.

Mediterranean Collections in Australia and Aotearoa New Zealand Candace Richards, Elizabeth Minchin, 2025-04-04 This volume brings together academics and museum professionals responsible for ancient Mediterranean collections across Australia and Aotearoa New Zealand to report on their collections' legacies and their ongoing value for research, education, and community engagement in the twenty-first century. An introductory chapter offers an overview of the themes that unite these Mediterranean collections: their colonial legacies, their more recent history, and the network of scholars who have fostered their development. Subsequent chapters offer thematic case studies from the perspective of curators, museum professionals, educators, and researchers working with collections across Australasia. They explore several themes, including museum archaeology, provenance studies, pedagogy, and participatory programming and engagement, and they address two issues that are of interest to everyone who engages with museum collections today: restitution and the ethical management and display of human remains. Taken together, these contributions situate the region's collections on a global scale, highlighting their continued relevance in the present and for the future. The volume includes a distribution guide to all known ancient Mediterranean collections in Australia and Aotearoa New Zealand, a much-needed resource for students, provenance researchers, and museum professionals. This volume will be of interest to researchers in Mediterranean archaeology and related disciplines, to museum studies scholars, and postgraduate students, and to a general audience.

Sport and Festival in the Ancient Greek World David Phillips, David Pritchard, 2003-12-31 How did sport and festival affect the ancient Greek city? How did the values of athletics pervade Greek culture? This collection of fifteen new studies from an international cast took its inspiration from the exceptional Sydney Olympics of 2000. The focus here is on the ancient world, but additionally, there is a sophisticated look at how Greek artefacts linked with sport can best be presented to the modern world.

Byzantine Chronicles and the Sixth Century Roger Scott, 2018-02-06 Byzantine

chronicles have traditionally been regarded as a somewhat inferior form of Byzantine history writing especially in comparison with classicizing historians The aim of many of these papers is both to rescue the reputation of the Byzantine chroniclers especially Malalas and Theophanes and also to provide some examples of how these two chroniclers in particular can be exploited usefully both to reveal aspects of the past itself notably of the period of Justinian and also of how the Byzantines interpreted their own past which included on occasions rewriting that past to suit altered contemporary needs For the period of Justinian in particular proper attention to aspects of the humble Byzantine chronicle can also help achieve a better understanding of the period than that provided by the classicizing Procopius with his emphasis on war and conquest By considering more general aspects of the place of history writing in Byzantine culture the papers also help explain why history remained such an important aspect of Byzantine culture

Jerusalem and Athens E. A. Judge, 2010 E. A. Judge's third collection of essays moves on from Rome and the New Testament to the interaction of the classical and biblical traditions to the cultural transformation of late antiquity and to the contested heritage of Athens and Jerusalem in the modern West A lifelong interest in Rome bridges this range Christianity emerges as essentially a movement of ideas opposed at first to the cultic practice of ancient religion which had been meant to secure the existing order of things The new message with its demanding morality laid the foundations for our radically different sense of religion as the quest for the ideal life The Judge method tackles such momentous questions by starting with textual detail translated from Latin and Greek Inspired by the project of the Dolger Institut in Bonn the interaction of antiquity and Christianity he brings to it a particular focus on those documents of the times retrieved from stone or papyrus The collection reflects the more holistic approach to history starting with the ancient world that has been developed at Macquarie University in Sydney where diverse interests are now drawn together from as far back as ancient Egypt or China in an attractive approach to the modern world

The Past, Present and Future of Sustainable Management Stephen Cummings,Todd Bridgman,2021-06-05 We might think sustainable management is a new idea created in the 1960s by enlightened modern scientists We might think that it puts us on a new path beyond what management was originally about But this is not true Sustainable management is as old as civilization and was a foundation stone of management science as it was formed in the first decade of the 20th century Recovering this forgotten past provides deeper roots and greater traction to advance sustainable management in our own times This book charts a history of sustainable management from premodern times through the birth of management science as an offshoot of the conservation movement to the present day The authors argue that modern tools like Triple Bottom Line reporting and multiple Sustainable Development Goals may be less useful than a return to a more fundamental and holistic view of management **Espionage: Past, Present and Future?** Wesley K.
