**How Students Understand the Past** M. Elaine Davis,2005-03-07 History and archaeology education is highly valued among modern societies that seek to educate their youth about the past Yet these areas have been\_for the most part\_slow to employ the latest advances in education theory and practice Former classroom teacher and science education specialist M Elaine Davis presents an informed and useful text that demonstrates the importance of contemporary learning theory and educational research to the development of effective programs in both formal and informal history and archaeology education Chapters cover teaching and history education theory and apply this to various case studies and program examples This text will prove a much valued tool for school teachers museum educators archaeologists and historians\_challenging and aiding educators to assess and improve their respective programs *Lost Causes* Jason B. Jones,2006 What if we didn't always historicize when we read Victorian fiction *Lost Causes* shows that Victorian writers frequently appear to have a more supple and interesting understanding of the relationship between history causality and narrative than the one typically offered by readers who are burdened by the new historicism As a return to these writers emphasizes the press of modern historicism deforms Victorian novels encouraging us to read deviations from strict historical accuracy as ideological bad faith By contrast Jason B Jones argues through readings of works ranging from *The French Revolution* to *Middlemarch* that literature's engagement with history has to be read otherwise Perhaps perversely *Lost Causes* suggests simultaneously that psychoanalysis speaks pressingly to the vexed relationship between history and narrative and that the theory is neither a nor anti historical Through his readings of Victorian fiction addressing the recent past Jones finds in psychoanalysis not a set of truths but rather a method for rhetorical reading ultimately revealing how its troubled account of psychic causality can help us follow literary language's representation of the real Victorian narratives of the recent past and psychoanalytic interpretation share a fascination with effects that persist despite baffling inexplicable or absent causes In chapters focusing on Thomas Carlyle Charles Dickens Charlotte Bront and George Eliot *Lost Causes* demonstrates that history can carry an ontological as well as an epistemological charge one that suggests a condition of being in the world as well as a way of knowing the world as it really is From this point of view Victorian fiction that addresses

the recent past is not a failed realism as it is so frequently claimed but rather an exploration of possibility in history *Get Wisdom* Ernest Verity, 2003-06
