Past Within Us:

The Past Within Us Tessa Morris-Suzuki, 2020-07-01 Despite predictions of the death of the past and the end of history the past refuses to go away In fact the start of the twenty first century has seen an upsurge of interest in popular representations of history on the large and small screen and of impassioned political conflicts over rival understandings of the past Historical responsibility and apology have become contentious topics of domestic politics and of international diplomatic relations and memory a profitable commodity for sale to mass markets Against this background how do historians deal with the problems of the search for historical truth The Past Within Us approaches these issues by examining the problems of representing history in the popular media Drawing on examples from East Asian and American as well as European history it poses the question What happens when accounts of history are transferred from one medium to another How far does the medium shape the message How can historians deploy contemporary media in ways which evoke and develop the historical imagination From the romances of Walter Scott to Steven Spielberg blockbusters from online Irish nationalism to Japanese revisionist comic books The Past Within Us explores some of the more dramatic modern popular representations and reflects on the key challenges and possibilities for the communication of history in a multimedia age

The Past Within Us Raymond Martin, 2014-07-14 Why do we interpret the past as we do rather than in some other way or not at all What is the significance of the fact that we interpret the past What are historical interpretations Raymond Martin's approach to these questions transcends both the positivist and humanistic perspectives that have polarized Anglo American philosophy of history Martin goes to the source of this polarization by diagnosing a deep seated flaw in the dominant analytic approach during the period from 1935 to 1975 namely the emphasis on conceptual analysis rather than the examination of actual historical controversies As an alternative Martin proposes an empirical approach that examines what makes one historical interpretation better than its competitors In addressing how historians should decide which explanations are better Martin opts for a case by case analysis of historiographical practice as opposed to establishing general criteria His book offers several detailed case studies involving such topics as the collapse of Lowland Maya civilization in the ninth century A D the fall of Rome and the alleged historical priority of St Mark's gospel over the other synoptic gospels Originally published in 1989 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Encountering the Past within the Present Siobhan Kattago, 2019-11-27 Encountering the Past within the Present Modern Experiences of Time examines different encounters with the past from within the present whether as commemoration nostalgia silence ghostly haunting or combinations thereof Taking its cue

from Hannah Arendt's definition of the present as a time span lying between past and future the author reflects on the old philosophical question of how to live the good life not only with others who are physically with us but also with those whose presence is ghostly and liminal While tradition may no longer command the same authority as it did in antiquity or the middle ages individuals are by no means severed from the past Rather nostalgic longing for bygone times and traumatic preoccupation with painful historical events demonstrate the vitality of the past within the present Divided into three parts chapters examine ways in which the legacies of World War II the Holocaust and communism have been remembered after 1945 and 1989 Maintaining a sustained reflection on the nexus of memory modernity and time in tandem with ancient questions of responsibility for one another and the world the volume contributes to the growing field of memory studies from a philosophical perspective As such it will appeal to scholars of sociology social theory and philosophy with interests in collective memory and heritage
