*Extraordinary Cities* Peter J. Taylor,2013-01-01 Peter J Taylor has produced a sweeping empirically grounded defense of cities as fundamental building blocks of long term large scale social structures a way of freeing social science from state centric bias and indeed mankind s hope However the single greatest strength of this complex seductive argument is the insistence on treating cities relationally as process Here the key to understanding the significance of cities is by studying them in terms of the dynamic networks they form and in their relations to states Richard E Lee Binghamton University US The founding father of the famous Globalization and World Cities research network and think tank on worldwide links between cities presents this fascinating overview on cities in geohistory By moving cities to the centre stage Peter Taylor proposes that concern for states tell only part of the macro social story of humanity Cities have

been and are the engines of innovation This impressive new book provides new insights into why cities succeed or fail The book is in the class with broadminded presentations like Jared Diamond s book Guns Germs and Steel Christian Matthiessen University of Copenhagen Denmark and President International Geographical Union s Commission on Urban Geography This is a big book by Peter Taylor It tells of the extraordinary world making powers of cities across the ages it explains why a state centric social science has constrained recognition of these powers over the last two centuries and it outlines a new indisciplinarity to help us make sense of a human condition increasingly forged out of the urban Anyone troubled by the social sciences as we know them ought to read this book Ash Amin Cambridge University UK and author Land of Strangers Accepting that cities are extraordinary this book provides an original city centred narrative of human creativity past present and future In this innovative ambitious and wide ranging book Peter Taylor demonstrates that cities are the epicenters of human advancement In exploring cities as sites through which economies flourish by harnessing the creative potential of myriad communication networks the author considers cities from varying temporal and spatial perspectives Four stories of cities are told the origins of city networks the domination of cities by world empires the genesis of a singular modern creative interval in which innovation culminates in today s globalised cities and finally the need for cities to act as centres for human creativity to produce a more resilient global society in the current crisis century Providing a long term view through which to consider the role of cities in attending to incipient crises of the twenty first century this closely argued thesis will prove essential for students and scholars of urban studies geography and sociology and all with a professional interest in or personal fascination for cities

**Genesis Quest** Barry Verdi, 2014-10-21 Are the stories in Genesis fact myth legend the word of God philosophy or something else Through time what people think or remember about Genesis has become a mixture of fact and fable For example if you were to ask someone what fruit Adam and Eve were tempted by most people might say An apple If you were to ask what color the apple was most people might state that they think the fruit was red Are these actual facts No people are simply using artistic imagination The stories in Genesis are multifaceted oral traditions about the human family that originated long before the established interpretations dogmas and doctrines of our contemporary world One thing the stories do indicate is that we are all genetically connected regardless of our outward appearance yet we are divided due to multiple factors related to our situation in life and personal beliefs The Genesis Quest examines ancient roots of human thinking to strip away veneers of progressive interpretations and reveal the evolution of a philosophy six principles of the human spirit looking for the soul of our communal life God creation good and evil sharing mercy saving life and communicating These principles are intended to help us understand what it means to be human
