## Patent To Kill:

*Patent to Kill* April Christofferson, 2005-03-24 Christofferson's gripping novels of medical suspense have drawn favorable comparisons to the work of Michael Crichton and Robin Cook. Now she returns with a page turning thriller that explores the cutting edge of medicine and murder. It is a new crime for a new century: Biopiracy—the theft of the healing secrets of isolated indigenous peoples. Rapacious pharmaceutical companies swoop down on remote Third World tribes, steal their folk medicine, native cures, and even human blood, then reap tremendous profits from the patents. Dr. Jake Scully doesn't want to think that his employer, Genchrom, is exploiting anyone, let alone killing natives for the unique properties of their DNA, but when he tries to blow the whistle on the company's criminal activities, he places his own life and his family in danger.
