Dewell, 2011 This is really two books in one a valuable reference resource and a groundbreaking case study that represents a new approach to constructional semantics It presents a detailed descriptive survey using extensive examples collected from the Internet of German verb constructions in which the expressions *durch* through *ber* over *unter* under and *um* around occur either as inseparable verb prefixes or as separable verb particles Based on that evidence the author argues that the prefixed verb constructions and particle verb constructions themselves have meaning and that this meaning involves subjective construal processes rather than objective information The constructions prompt us to distribute focal attention according to patterns that can be articulated in terms of Talmy's notion of perspectival modes Among the other topics that play an important role in the analysis are incremental themes reflexive trajectors fictive motion multi directional paths and accusative landmarks
