*Zen-Brain Horizons* James H. Austin, 2014-08-22 A neurologist and Zen practitioner clarifies the benefits of meditative training, drawing on classical Buddhist literature and modern brain research. In *Zen Brain Horizons*, James Austin draws on his decades of experience as a neurologist and Zen practitioner to clarify the benefits of meditative training. Austin integrates classical Buddhist literature with modern brain research, exploring the horizons of a living neural Zen. When viewed in the light of today, the timeless wisdom of some Zen masters seems almost to have anticipated recent research in the neurosciences. The keen attentiveness and awareness that we cultivate during meditative practices becomes the leading edge of our subsequent mental processing. Austin explains how our covert involuntary functions can make crucial contributions to the subtle ways we learn, intuit, and engage in creative activities. He demonstrates why living Zen means much more than sitting quietly indoors on a cushion and provides simplified advice that helps guide readers to the most important points.

*Turning Words* Hozan Alan Senauke, 2023-03-07 A poignant portrait of spiritual relationships in the diverse worlds of American and global Buddhism through stories of over 30 luminaries, including His Holiness the Dalai Lama, Thich Nhat Hanh, Joan Halifax, Joanna Macy, and more. Across more than thirty-five years of practice in Zen and socially engaged Buddhism, Alan Senauke has had a range of remarkable encounters with Buddhist teachers and spiritual friends. Here he collects stories of moments in which someone's words, actions, or presence opened his mind and heart in a new way. Touching on meditation, insight, social action, race, family, community, and more, these vignettes build like a chorus and convey lessons such as taking one's work seriously without taking oneself seriously, letting things fall apart, and using oneself up on behalf of others. The book's stories and accompanying photographs feature many of the greatest Zen teachers, engaged Buddhists, and global Buddhist leaders of our day, including Robert Aitken, Bernie Glassman, Shodo Harada, Dainin Katagiri, Jarvis Masters, Ven. Sheng Yen, Sulak Sivaraksa, and many more, with a special section devoted to the teachings of Senauke's primary teacher, Sojun Mel Weitsman.

*What Can Neuroscience Learn from Contemplative Practices?* Zoran Josipovic, Bernard J. Baars, 2016-09-22 A recent wave of brain research has advanced our understanding of the neural mechanisms of conscious states, contents, and functions. A host of questions remain to be explored, as shown by lively debates between models of higher vs. lower order aspects of consciousness, as well as global vs. local models. Baars, 2007; Block, 2009; Dennett and Cohen, 2011; Lau and Rosenthal, 2011. Over some twenty-five centuries, the contemplative traditions have also developed explicit descriptions and taxonomies of the mind to interpret experiences that are often reported in contemplative

practices Radhakrishnan Rinbochay reflexivity or self knowing associated with consciousness the sense of self and consciousness and aspects of consciousness that are said to continue during sleep These real or claimed aspects of consciousness have not been fully integrated into scientific models so far This Research Topic in Consciousness Research aims to provide a forum for theoretical proposals new empirical findings integrative literature reviews and methodological improvements inspired by meditation based models We include a broad array of topics including but not limited to replicable findings from a variety of systematic mental practices changes in brain functioning and organization that can be attributed to such practices their effects on adaptation and neural plasticity measurable effects on perception cognition affect and self referential processes We include contributions that address the question of causal attribution Many published studies are correlational in nature because of the inherent difficulty of conducting longitudinal experiments based on a major lifestyle decision such as the decision to commit to a mental practice over a period of years We also feature clinical and case studies integrative syntheses and significant opinion articles
