Dynamic Information Retrieval Modeling Grace Hui Yang, Marc Sloan, Jun Wang, 2022-05-31 Big data and human computer information retrieval HCIR are changing IR They capture the dynamic changes in the data and dynamic interactions of users with IR systems A dynamic system is one which changes or adapts over time or a sequence of events Many modern IR systems and data exhibit these characteristics which are largely ignored by conventional techniques What is missing is an ability for the model to change over time and be responsive to stimulus Documents relevance users and tasks all exhibit dynamic behavior that is captured in data sets typically collected over long time spans and models need to respond to these changes Additionally the size of modern datasets enforces limits on the amount of learning a system can achieve Further to this advances in IR interface personalization and ad display demand models that can react to users in real time and in an intelligent contextual way In this book we provide a comprehensive and up to date introduction to Dynamic Information Retrieval Modeling the statistical modeling of IR systems that can adapt to change We define dynamics what it means within the context of IR and highlight examples of problems where dynamics play an important role We cover techniques ranging from classic relevance feedback to the latest applications of partially observable Markov decision processes POMDPs and a handful of useful algorithms and tools for solving IR problems incorporating dynamics The theoretical component is based around the Markov Decision Process MDP a mathematical framework taken from the field of Artificial Intelligence AI that enables us to construct models

that change according to sequential inputs We define the framework and the algorithms commonly used to optimize over it and generalize it to the case where the inputs aren't reliable We explore the topic of reinforcement learning more broadly and introduce another tool known as a Multi Armed Bandit which is useful for cases where exploring model parameters is beneficial Following this we introduce theories and algorithms which can be used to incorporate dynamics into an IR model before presenting an array of state of the art research that already does such as in the areas of session search and online advertising Change is at the heart of modern Information Retrieval systems and this book will help equip the reader with the tools and knowledge needed to understand Dynamic Information Retrieval Modeling

Rediscovering Reverence, The Path to Intimacy Matt L Rawlins, 2005 Are you aching for an intimate walk with God One where you know He understands you and what you are going through Where you understand His heart and desire for you and you see His plan unfolding in your life Rediscovering Reverence unlocks the mystery of walking in daily intimacy with God Reverence due the Almighty is rarely taught from the pulpit anymore and a lack of knowledge of this important principle is robbing God's people of the intimacy they desire This roadblock keeps many from discovering a more fulfilling relationship with God today and the glorious future planned for them tomorrow Fear swirls around us insecurity becomes a good friend and terror seems to dwell on our doorstep We sense we need help but we don't know where to turn God tells us He is that dwelling place where we can hide from fear insecurity and terror But if we don't know who He is we won't know where to run This book has its biblical roots embedded in the numerous examples of great men and women of faith whose destinies were released only as they walked in the fear of the Lord The author also shares personal examples of his own journey in fearing the Lord Rediscovering Reverence explores the divine sequence in a reverent and intimate relationship with God Many people understand and long for intimacy with God but few in the West realize that the fear of the Lord is a foundation for that You can't have intimacy without reverence This fast paced and readable book maintains a compassionate and personable tone while challenging the reader spiritually and intellectually Every Christian who yearns to discard his discontented lukewarm lifestyle and pursue a serious and fulfilling life in God should read Rediscovering Reverence
