Public Markets and Civic Culture in Nineteenth-Century America Helen Tangires, 2020-03-24 Originally published in 2003 In *Public Markets and Civic Culture in Nineteenth Century America* Helen Tangires examines the role of the public marketplace social and architectural as a key site in the development of civic culture in America More than simply places for buying and selling food Tangires explains municipally owned and operated markets were the common ground where citizens and government struggled to define the shared values of the community Public markets were vital to civic policy and reflected the profound belief in the moral economy the effort on the part of the municipality to maintain the social and political health of its community by regulating the ethics of trade in the urban marketplace for food Tangires begins with the social architectural and regulatory components of the public market in the early republic when cities embraced this ancient system of urban food distribution By midcentury the legalization of butcher shops in New York City and the incorporation of market house companies in Pennsylvania challenged the system and hastened the deregulation of this public service Some cities demolished their marketing facilities or loosened restrictions on the food trades in an effort to deal with the privatization movement However several decades of experience with dispersed retailers suburban slaughterhouses and food transported by railroad proved disastrous to the public welfare prompting cities and federal agencies to reclaim this urban civic space

Selling Antislavery Teresa A. Goddu, 2020-03-13 Beginning with its establishment in the early 1830s the American Anti Slavery Society AASS recognized the need to reach and consolidate a diverse and increasingly segmented audience To do so it produced a wide array of print material and visual media almanacs and slave narratives pincushions and gift books broadsides and panoramas Building on the distinctive practices of British antislavery and evangelical reform movements the AASS utilized innovative business strategies to market its productions and developed a centralized distribution system to circulate them widely In *Selling Antislavery* Teresa A Goddu shows how the AASS operated at the forefront of a new culture industry and by framing its media as cultural commodities made antislavery sentiments an integral part of an emerging middle class identity She contends that although the AASS's dominance waned after 1840 as the organization splintered it nevertheless created one of the first national mass markets Goddu maps this extensive media culture focusing in particular on the material produced by AASS in the decade of the 1830s She considers how the dissemination of its texts objects and tactics was facilitated by the quasi corporate and centralized character of the organization during this period and demonstrates how its institutional presence remained important to the progress of the larger movement Exploring antislavery's vast archive and explicating its messages she emphasizes both the discursive and material aspects of antislavery's appeal providing a richly textured history of the movement through its artifacts and the modes of circulation it put into place Featuring more than seventy five illustrations *Selling Antislavery* offers a thorough case study of the role of reform movements in the rise of mass media and argues for abolition's central importance to the shaping of antebellum middle class culture

The Moral and Market Economies of Bread Jonas Albrecht, 2024-06-13 From the 1770s the Vienna bread market was rocked by a series of politico

economic and technological changes that questioned the way this everyday foodstuff was sold and produced In this book Jonas Albrecht explores how this reconfiguration of the bread market had wide reaching and significant consequences for a society who relied on this foodstuff to live Before 1860 the production and selling of bread was embedded into a moral economy with distinct regulations But as the grain market expanded and new cereal varieties arrived from the empire s peripheries reformers sought to create a free market through liberalizing reforms The Moral and Market Economies of Bread shows that while terminating market regulation did mobilize and diversify Vienna s bread market in spatial terms it intensified inequality among consumers As opaque prices non transparent market procedures and diverging power relations between producers and consumers led to unrest city officials and bakers struggled to meet the shortcomings of the free market from within This book brings economic social and urban histories together and employs a spatial approach and GIS methods to explore the relationship between market and society and capitalism at large
