Public Participation In Sustainability Science A Handbook:

Public Participation in Sustainability Science Bernd Kasemir, 2003-04-10 This book discusses how citizens can participate more effectively in sustainability science and environmental policy debates It discusses designs for participatory procedures and experiences of their application to issues of global change While the focus is on citizen participation the involvement of specific stakeholders including water managers and venture capitalists is also addressed The book describes how focus group methods were combined with the interactive use of computer models into new forms of participation tested with six hundred citizens The results are discussed in relation to other important topics including greenhouse gas and water management By combining this with an examination of issues of interactive governance and developing country participation the book provides state of the art practical insights for students researchers and policy makers alike **Transdisciplinarity**

For Sustainability Martina M. Keitsch, Walter J.V. Vermeulen, 2020-11-23 This volume explores interactions between academia and different societal stakeholders with a focus on sustainability It examines the significance and potential of transdisciplinary collaboration as a tool for sustainability and the SDGs Traditionally academia has focused on research and education More recently however the challenges of sustainable development and achieving the SDGs have required the co production of knowledge between academic and non academic actors Compromising theory methods and case studies from a broad span of transdisciplinary collaboration Transdisciplinarity For Sustainability Aligning Diverse Practices is written by specialists from various academic disciplines and represents an important step forward in systematising knowledge and understanding of transdisciplinary collaboration They are designed to provide a roadmap for further research in the field and facilitate pursuing and realizing the SDGs The book will appeal to researchers and postgraduate students in a variety of disciplines such as architecture design economics social sciences engineering and sustainability studies It will also be of significant value to professionals who are engaged in transdisciplinary collaboration that supports sustainable development

Measurements, Indicators, and Research Methods for Sustainability Ian Spellerberg, Daniel S. Fogel, Sarah E. Fredericks, Lisa M. Butler Harrington, Maria Proto, Patricia Wouters, 2012-04-09 Measurements Indicators and Research Methods for Sustainability presents a thorough and accessible overview of the ways in which sustainability is charted worldwide Some articles introduce basic concepts such as quantitative versus qualitative data or the weak versus strong sustainability debate others examine how indicators in specific areas climate change and soil conservation agriculture and mining have been applied or not to different regions Research analysts explain the modes and media through which these measurements are broadcast stressing the importance of developing methods that can be understood by both experts and ordinary citizens They also examine the process of monitoring itself a controversial topic affecting national or international policy law rules and regulations **Science and Technology in Disaster Risk Reduction in Asia** Rajib Shaw, Koichi Shiwa, Takako Izumi, 2017-10-13 Science and Technology in Disaster Risk Reduction in Asia Potentials and Challenges

provides both a local and global perspective on how to implement the Sendai Framework for Disaster Risk Reduction Topics demonstrate the advancement of scientific research as it applies to early warning systems including identifying risk and the strengthening of infrastructure for different types of hazards Through different major disasters it has become evident that there must be a balance between hard and soft technology and physical process and social solutions This book demonstrates how this has been successfully implemented in Asia and how these applications can apply on a global basis Covers new research on the role of science in Disaster Risk Reduction and lessons learned when research has been applied Utilizes case studies to outline the broader lessons learned Focuses on the Sendai Framework which was adopted in the Third UN World Conference in 2015

Carbon Capture and its Storage Clair Gough, 2016-12-05 Climate change is arguably the most important environmental issue that the world currently faces Carbon Capture and Storage CCS offers the possibility of significant reductions in the volume of CO₂ released into the atmosphere in the near to medium term As a fairly new technology that has not been widely adopted there remain some uncertainties related to both viability and desirability This book discusses the key issues with regard to technical and legal feasibility economic viability and public and stakeholder perceptions It also provides recommendations for policy and future research

Ethnographies of Science Education Carol Brandt, Heidi B Carlone, 2015-09-25 Researchers who conduct ethnography in science education tend to have a deep commitment for transforming science to improve the lives of people in underserved communities This edited volume explores how contemporary ethnographers in science education bring to light the local production of scientific knowledge and the ways it is implicated in larger social and political struggles Ethnographies in science education contribute to understanding the experiences of linguistically racially and economically diverse populations who have been historically excluded from participation in science An anthropological approach has also been instrumental in explicating the situated practices by which students enact science in the classroom and in their lives beyond schools This edited volume brings together ethnographers in science education to contribute a global perspective on science teaching and learning in school and university classrooms at home and after school programs Included are examples of ethnography in science education from the UK Argentina Canada and the USA in which contributors point to promising directions for theorizing the culture of science education as we undertake educational reform The authors in this volume argue that ethnography is not only a valid approach for the study of science education but also they contend that it is essential to the development of more equitable practices for instruction and learning This book was originally published as a special issue of *Ethnography and Education*

Organizational Leadership John Bratton, 2020-02-29 Organizational Leadership provides an accessible critical and engaging analysis of what constitutes leadership today Demonstrating leadership as an interconnected process between leaders followers and context the book ensures a rounded understanding of theory and practice to support students throughout their course and future career Part 1 Contextualising Leadership examines the internal and external forces
