Public Justice ,1997 Mapping the Chemical Environment of Urban Areas Christopher C. Johnson,Alecos Demetriades,Juan Locutura,Rolf Tore Ottesen,2011-02-11 This comprehensive text focuses on the increasingly important issues of urban geochemical mapping with key coverage of the distribution and behaviour of chemicals and compounds in the urban environment Clearly structured throughout the first part of the book covers general aspects of urban chemical mapping with an overview of current practice and reviews of different aspects of the component methodologies The second part includes case histories from different urban areas around Europe authored by those national or academic institutions tasked with investigating the chemical environments of their major urban centers *Participatory Budgeting in Global Perspective* Brian Wampler,Stephanie McNulty,Stephanie L. McNulty,Michael Touchton,2021 Participatory Budgeting continues to spread across the globe as government officials and citizens adopt this innovative democratic program in the hopes of strengthening accountability civil society and well being Governments often adapt PB s basic program design to meet local needs thus creating wide variation in how PB programs function Some programs retain features of radical democracy others focus on community mobilization and yet other programs seek to promote participatory development Participatory Budgeting in Global Perspective provides a theoretical and empirical explanation to account for widespread variation in PB s adoption adaptation and impacts This book develops six PB types to account for the wide variation in how PB programs function as well as the outcomes they produce To illustrate the similar patterns across the globe four empirical chapters present a rich set of case studies that illuminate the wide differences among these programs chapters are organized regionally with chapters on Latin America Asia Sub Saharan Africa Europe and North America By organizing the chapters regionally it becomes clear that there are temporal spatial economic and organizational factors that produce different programs across regions but similar programs within each region A key empirical finding is that the change in PB rules and design is now leading to significant differences in the outcomes these programs produce We find that some programs successfully promote accountability expand civil society and improve well being but too often researchers do not have any evidence tying PB to significant social or political change **Right to Information** E.M.S. Natchiappan,2014-01-01 Knowledge is power Knowledge is enriched by information A person legal entity a society a corporate body MNC and any country wants to use the information for their benefits The amount of information analysis research and development enhances the individual s life society and the country Much more importance for information of governance is the soul of democracy The information and the right to access to it is the foundation of civilization This book is the exposure of the secret of importance on access to information which was transparent in the early part of civilization but shrunk into the hands of individuals during colonial rule This made the individual into a slavery system loosing the entire freedom of information from which liberation happened after long struggle in various parts of the world India could achieve this Right to
