A New Institutional Economics Perspective on Industry Self-Regulation Jan Sammeck, 2011-12-06 The idea of self regulation as an instrument capable of mitigating socially undesirable practices in industries such as corruption environmental degradation or the violation of human rights is receiving substantial consideration in theory and practice By approaching this phenomenon with the theory of the New Institutional Economics Jan Sammeck develops an analytical approach that points out the critical mechanisms which decide about the effectiveness of this instrument By integrating theory with practical examples of self regulation this study highlights the necessity to look at the institutional incentives of an industry in order to come to a sound judgement about the feasibility and effectiveness of this instrument in a given situation

The Oxford Handbook of Regulation Robert Baldwin, Martin Cave, Martin Lodge, 2012-07-19 Regulation is often thought of as an activity that restricts behaviour and prevents the occurrence of certain undesirable activities but the influence of regulation can also be enabling or facilitative as when a market could potentially be chaotic if uncontrolled This Handbook provides a clear and authoritative discussion of the major trends and issues in regulation over the last thirty years together with an outline of prospective developments It brings together contributions from leading scholars from a range of disciplines and countries Each chapter offers a broad overview of key current issues and provides an analysis of different perspectives on those issues Experiences in different jurisdictions and insights from various disciplines are drawn upon and particular attention is paid to the challenges that are encountered when specific approaches are applied in practice Contributors develop their own distinctive arguments relating to the central issues in regulation and apply scholarly rigour and clear writing to matters of high policy relevance The essays are original accessible and agenda setting and the Handbook will be essential reading both to students and researchers and to with regulatory and regulated professionals

provides an introduction to the ways in which five different disciplines have approached the study of business and government The second section on the firm and the state looks at how these entities interact in different settings emphasising such phenomena as the global firm and varieties of capitalism The third section examines how business interacts with government in different parts of the world including the United States the EU China Japan and South America The fourth section reviews changing patterns of market governance through a unifying theme of the role of regulation Business government relations can play out in divergent ways in different policy and the fifth section examines the contrasts between different key arenas such as competition policy trade policy training policy and environmental policy The volume provides an authoritative overview with chapters by leading authorities on the current state of knowledge of business government relations but also points to ways in which this work might be developed in the future e g through a political theory of the firm

Configuring Value Conflicts in Markets Susanna Alexius,Kristina Tamm Hallström,2014-01-01

Economic values shape markets as does sustainability safety decency public health and democracy Based on micro process studies in a dozen markets this multi disciplinary book presents a typology of strategic responses to value plurality in markets and helps to explain how such value work influences market reform Value plurality may be reinforced and turned into open conflicts but also played down in configurations that neutralize align balance or hierarchize values By highlighting the role of values in markets this book clarifies why and how markets are organized

Limits to Privatization Marianne Beishem,Oran R Young,Ernst Ulrich von Weizsacker,Matthias Finger,2012-04-27 Limits to Privatization is the first thorough audit of privatizations from around the world It outlines the historical emergence of globalization and liberalization and from analyses of over 50 case studies of best and worst case experiences of privatization it provides guidance for policy and action that will restore and maintain the right balance between the powers and responsibilities of the state the private sector and the increasingly important role of civil society The result is a book of major importance that challenges one of the orthodoxies of our day and provides a benchmark for future debate

Responsible Business Olaf Dilling,Martin Herberg,Gerd

Winter,2008-07-01 With the globalisation of markets the phenomenon of market failure has also been globalised Against the backdrop of the territoriality of nation state jurisdictions and the slow progress of international law based on the principle of sovereignty this poses a serious challenge However while the legal infrastructure of globalised markets has a firm basis in formal national and international law the side effects of economic transactions on public goods such as the environment human health and consumer interests often escape state based regulation Therefore attention is drawn to the potential of self regulation by transnational industry While hypotheses abound which try to grasp this phenomenon in conceptual terms both empirical and legal research is still underdeveloped This volume helps to fill this gap in two ways firstly by reconstructing self regulatory settings such as multinational corporations transnational production networks and industry NGO partnerships in terms of organisation problem solving and legitimation and secondly by linking their empirical findings to formal law by

examining how legal concepts are reflected in self regulation how the law builds on self regulatory solutions and how it helps to establish favorable conditions for private governance
