Public Service The Cpa:

Fire and Rescue Services Peter Murphy, Kirsten Greenhalgh, 2017-09-10 This unique text fills a major gap in the emergency services literature by surveying the research on fire and rescue service management in the UK. An extensive evidence base focuses on organizational culture, leadership skills, standards and accountability, emphasizing the services dual roles as first responders and guardians of public safety and prevention. The implications for international public health and safety programs are made clear as the services recent history illustrates the complex challenges typical of functioning within local and national political contexts. Chapters take on a broad range of management, leadership, service delivery and staffing concerns including Evolution and adaptation of fire and rescue services during periods of expansion and austerity, Civil protection as a local and national priority, Structural issues, assessments and improvements, collaborations with other services, Emerging social concerns, diversity, gender equality, the aging worker population. The concepts and consequences of heroes and heroism, Future directions for governance, transparency and accountability. *Fire and Rescue Services* complements the earlier volumes in the *Leadership Management of Emergency Services* series with equal parts realism and vision. It should interest a wide audience of public policymakers, public managers and emergency service personnel as well as academics and researchers.

Evaluating Information Systems Zahir Irani, Peter Love, 2008-05-12 The adoption of Information Technology (IT) and Information Systems (IS) represents significant financial investments with alternative perspectives to the evaluation domain coming from both the public and private sectors. As a result of increasing IT/IS budgets and their growing significance within the development of an organizational infrastructure, the evaluation and performance measurement of new technology remains a perennial issue for management. This book offers a refreshing and updated insight into the social fabric and technical dimensions of IT/IS evaluation together with insights into approaches used to measure the impact of information systems on its stakeholders. In doing so, it describes the portfolio of appraisal techniques that support the justification of IT/IS investments. *Evaluating Information Systems* explores the concept of evaluation as an evolutionary and dynamic process that takes into account the ability of enterprise technologies to integrate information systems within and between organisations. In particular, when set against a backdrop of organisational learning, it examines the changing portfolio of benefits, costs and risks associated with the adoption and diffusion of technology in today's global marketplace. Finally, approaches to impact assessment through performance management and benchmarking are discussed.
