Privately Owned Public Space Jerold S. Kayden, New York (N.Y.). Department of City Planning, The Municipal Art Society of New York, 2000-11-06 Until now comprehensive systematic knowledge about this vast collection of public spaces has not existed either for experts or members of the public Through words photographs scaled site plans maps and analysis of newly assembled data the book examines the history law design and use of the city's privately owned public spaces Each of the more than 500 spaces is individually discussed to provide far reaching comparative information about this unique category of public space **Public Space** Stephen Carr, 1992 The authors offer a perspective of how to integrate public space and public life They contend that three critical human dimensions should guide the process of design and management of public space the users essential needs their spatial rights and the meanings they seek **Why Public Space Matters** Setha M. Low, 2023 Why Public Space Matters examines how public space contributes to individual and societal flourishing Based on thirty five years of ethnographic fieldwork on plazas walkways parks markets and beaches in the United States Costa Rica Argentina India Kenya and France it presents a new understanding of the role of social contact public culture and affective atmosphere in the creation of places essential to everyday urban life **The Politics of Public Space** Setha M. Miller, New York City is home to some of the most recognizable places in the world As familiar as the sight of New Year's Eve in Times Square or a protest in front of City Hall may be to us do we understand who controls what happens there Kristine Miller delves into six of New York's most important public spaces to trace how design influences their complicated lives Miller chronicles controversies in the histories of New York locations including Times Square Trump Tower the IBM Atrium and Sony Plaza The story of each location reveals that public space is not a concrete or fixed reality but rather a constantly changing situation open to the forces of law corporations bureaucracy and government The qualities of public spaces we consider essential including accessibility public ownership and ties to democratic life are at best temporary conditions and often completely absent Design is in Miller's view complicit in regulation of public spaces in New York City to exclude undesirables restrict activities and privilege commercial interests and in this work she shows how design can reactivate public space and public life Kristine F Miller is associate professor of landscape architecture at the University of Minnesota **The Invention of Public Space** Mariana Mogilevich, 2020-08-04 The interplay of psychology design and politics in experiments with urban open space As suburbanization racial conflict and the consequences of urban renewal threatened New York City with urban crisis the administration of Mayor John V Lindsay 1966 1973 experimented with a broad array of projects in open spaces to affirm the value of city life Mariana Mogilevich provides a fascinating history of a watershed moment when designers government

administrators and residents sought to remake the city in the image of a diverse free and democratic society New pedestrian malls residential plazas playgrounds in vacant lots and parks on postindustrial waterfronts promised everyday spaces for play social interaction and participation in the life of the city Whereas designers had long created urban spaces for a broad amorphous public Mogilevich demonstrates how political pressures and the influence of the psychological sciences led them to a new conception of public space that included diverse publics and encouraged individual flourishing Drawing on extensive archival research site work interviews and the analysis of film and photographs *The Invention of Public Space* considers familiar figures such as William H Whyte and Jane Jacobs in a new light and foregrounds the important work of landscape architects Paul Friedberg and Lawrence Halprin and the architects of New York City's Urban Design Group *The Invention of Public Space* brings together psychology politics and design to uncover a critical moment of transformation in our understanding of city life and reveals the emergence of a concept of public space that remains today a powerful if unrealized aspiration

Public Space and the Ideology of Place in American Culture, 2009-01-01 We typically take public space for granted as if it has continuously been there yet public space has always been the expression of the will of some agency person or institution who names the space gives it purpose and monitors its existence And often its use has been contested These new essays written for this volume approach public space through several key questions Who has the right to define public space How do such places generate and sustain symbolic meaning Is public space unchanging or is it subject to our subjective perception Do we given the public nature of public space have the right to subvert it These eighteen essays including several case studies offer convincing evidence of a spatial turn in American studies They argue for a re-visioning of American culture as a history of place making and the instantiation of meaning in structures boundaries and spatial configurations Chronologically the subjects range from Pierre L Enfant's initial majestic conceptualization of Washington D C to the post modern realization that public space in the U S is increasingly a matter of waste Topics range from parks to cities to small towns from open air museums to airports encompassing the commercial marketing of place as well as the subversion and re-possession of public space by the disenfranchised Ultimately public space is variously imagined as the site of social and political contestation and of aesthetic change

Public Space Angela D'Ascoli, 2018 Public spaces have been and still are the central topic of countless numbers of studies Despite their continuing considerable relevance which crosses the threshold of metropolitan settings there has been hardly any in depth professional and academic debate on what public spaces are outside the city walls and how they take part in this process of
