Public Policy in Transition Economies Maciej J. Grodzicki, Anna Zachorowska-Mazurkiewicz, 2024-06-21 Public policies are usually carefully designed to address a particular problem but they are also shaped and influenced by the sociocultural heritage of a particular country This volume explores the origins of economic and other public policies in Central and Eastern Europe This region makes for a particularly interesting case because after going through a major system change transitioning from a command economy into a market economy many of the key policies were written anew The contributors to this book look at key policy areas at the intersection of state and private sectors including industrial pension energy and competition policies The chapters examine key questions such as how did these policies evolve from the time of transition to their final form What were the main drivers of policy conduct and factors influencing major policy choices How does the historical context impact contemporary policy space Throughout the volume an institutional approach is adopted according to which policies are perceived as the outcome of top down design filtered through social institutions inherited from the past With this approach this book presents a long running assessment over 30 years of policymaking in transition economies which were subject to profound changes throughout the period This book will be of interest to readers in institutional economics policy studies transition economies and the recent history of Eastern Europe Internationalisation and Economic Institutions Mark Thatcher, 2007-07-19 This book examines when how and why internationalisation affects

national economic institutions It confronts questions at the heart of debates in political economy and comparative politics What does internationalisation of markets mean Who are its carriers in domestic arenas Through which mechanisms does it affect decisions about national institutional reform What are institutional outcomes in the face of internationalisation The book responds to its questions by looking at key economic institutions in five strategic sectors securities trading telecommunications electricity airlines and postal services It compares across four countries that represent different varieties of capitalism namely Britain France Germany and Italy over the period between 1965 and 2005 Thus it combines cross national historical and cross sectoral comparisons The author distinguishes technological and economic forms of internationalisation from policy forms notably decisions in powerful overseas nations and supranational regulation He argues that contrary to expectations the first was met with institutional inertia In contrast policy forms of internationalisation namely reforms in the US and European Union regulation played significant roles in undermining long standing national institutions The book explores the mechanisms whereby policy forms of internationalisation were influential by looking at the strategies coalitions and resources of key actors in national arenas It also shows that institutional outcomes were surprising all four countries albeit through different routes adopted increasingly similar reforms of economic institutions privatisation the ending of monopolies and delegation to independent regulatory agencies The book rejects the view that technological and economic forms of internationalisation drive institutional change It suggests that policy forms of internationalisation are more important because they become part of domestic decision making and aid the reform of well established national institutions

Political Institutions and Public Policy B. Steunenberg, F. van Vught, 2012-12-06 The discipline of public

administration and public policy is experiencing a renaissance of research in which explicit attention is paid to political institutions This renewed interest in institutions is not simply an extension of the classical paradigm in the study of public administration which peaked in the 1920s and 1930s but offers a new orientation on political institutions While classical institutionalism is known for its focus on the formal structures of the executive branch of government the new institutionalism concentrates on the interaction between political institutions and the behavior of policy makers This interaction which until recently was largely neglected in public administration and public policy forms the basic theme of this volume To advance the study of political institutions two rather basic problems need to be addressed What are institutions and what are adequate ways to analyze them We briefly discuss both questions which determine the structure of this book

The Economic Approach to Public Policy Ryan Amacher, Robert D. Tollison, Thomas D. Willett, 2019-06-30 Can traditional economic theory help to solve today's vexing social problems This unique collection of thirty six papers strongly suggests that it can The economic approach is applied imaginatively by the authors to a wide range of contemporary issues such as crime higher education the environment revenue sharing equity justice and the distribution of income The articles also deal with governmental behavior and the role of the economist as governmental adviser Shaped during the preparation and teaching of

college classes the book is well suited for courses in principles of economics microeconomics price theory and public policy development and analysis It should also prove a useful reference work for policy makers

Complexity, Institutions and Public Policy Graham Room,2011 I think this is a very important book Very few people in the social sciences write books on this topic and really do justice to complexity theory Professor Room gives a very detailed accurate and accessible review of complexity theory as it applies to social policy His link with institutional theory is very appropriate and his discussion on the need for regulation a link with complexity theory that many people would never reach is really important and well grounded It would be of interest to academics who really want to understand the implications of complexity theory for policy making in complex and fast changing situations and to those undertaking advanced courses in politics economics and sociology Jean Boulton University of Cranfield UK Graham Room argues that conventional approaches to the conceptualisation and measurement of social and economic change are unsatisfactory As a result researchers are ill equipped to offer policy advice This book offers a new analytical approach combining complexity science and institutionalism It also provides tools for policy makers in turbulent times Part 1 is concerned with the conceptualisation of socio economic change It integrates complexity science and institutionalism into a coherent ontology of social and policy dynamics Part 2 is concerned with models and measurement It combines some of the principal approaches developed in complexity analysis with models and methods drawn from mainstream social and political science Part 3 offers empirical applications to public policy the dynamics of social exclusion the social dimension of knowledge economies the current financial and economic crisis These are supplemented by a toolkit for the practice of agile policy making
