Public Power Private Life:

Public Power, Private Interests and Where Do We Fit In? Edmund F. Byrne, 1998 All over the world the statues of Mary are miraculously crying In the meantime a journalist in Washington D C is diverted away from her own personal demons when she takes it upon herself to question why the Vatican is not declaring these occurrences as miracles after witnessing the unexplainable phenomena herself The journalist suspects her nightly barrage of haunting nightmares about the violent murders of countless women from five thousand year old priestesses to women accused of being witches in the seventeenth century may have something to do with the answer as she investigates the biggest story of her life Women all over the world in the 21st century are feeling the awakening as the discovery of ancient artifacts are disproving the beliefs set forth by patriarchal religions for thousands of years When the journalist receives a visitation from a beautiful Goddess who at first appears to be the Virgin Mary she suddenly realizes that an ancient religious and political cover up has grossly distorted some very important historical truths As the journalist investigates and begins to publicly write about what she has uncovered death threats and terror follow next as powerful members of the world's patriarchal religions and the age old male run organizations that support them fight viciously to keep one of the world's oldest and most deceptive societal form of control against women hidden from the world But as intimidation and threats increase so too do the miracles and visitations from the real Sleeping Goddess as she awakens once again to bless and protect the world while igniting the hearts and souls of oppressed women everywhere

Public Power, Private Dams Karl Boyd Brooks, 2009-11-17 In the years following World War II the world's biggest dam was almost built in Hells Canyon on the Snake River in Idaho Karl Boyd Brooks tells the story of the dam controversy which became a referendum not only on public power expansion but also on the environmental implications of the New Deal's natural resources and economic policy Private power critics of the Hells Canyon High Dam posed difficult questions about the implications of damming rivers to create power and to grow crops Activists attorneys and scientists pioneered legal tactics and political rhetoric that would help to define the environmental movement in the 1960s The debate however was less about endangered salmon or threatened wild country and more about who would control land and water and whether state enterprise or private capital would oversee the supply of electricity By thwarting the dam's construction Snake Basin irrigators retained control over water as well as economic and political power in Idaho putting the state on a postwar path that diverged markedly from that of bordering states In the end the opponents of the dam were responsible for preserving high deserts and mountain rivers from radical change With Public Power Private Dams Karl Brooks makes an important contribution not only to the history of the Pacific Northwest and the region's anadromous fisheries but also to the environmental history of the United States in the period after World War II

Goodman,2010-09-27 Feminist Theory in Pursuit of the Public argues that feminism needs to develop a theory of the public It responds to a moment when feminism s impetus to reconstitute the private sphere left a huge gap in its political thinking on the public This inattention to the public is particularly worrisome now when the nation state and its publics seem to have diminishing power and compromised democratic agency The waning of power in the public sphere diminishes the influence that citizens can have in deciding on the conditions of life and therefore minimizes the changes that feminists can envision or enact in the social field to work towards equality access deliberation participation just distribution rights and authority for women
