Public School Monopoly:

The Public School Monopoly Robert B. Everhart,1982 **THE PUBLIC SCHOOL MONOPOLY : A CRIT. ANALYSIS OF EDUCATION AND THE STATE IN AMERICAN SOCIETY** ,1984 **School Choices** John

Merrifield,2002-09-01 The school choice movement has gained political momentum in recent years with programs having been established in Milwaukee Florida Texas and elsewhere But today s programs are nothing like the free market in education proposed four decades ago by the early proponents of school choice Economist John Merrifield shows that the school choice movement has become mired in false alternatives petty distinctions and diminished vision Yet he argues that programs providing real educational choices must not be allowed to fail like so many government programs a freely competitive market for education must remain the ultimate goal School Choices True and False charts a course for the achievement of this goal **The School-to-Prison Pipeline** Peter Thalheim,2022-05-02 The school to prison pipeline is not what it is popularly advertised to be by the major media whereby the installation of safety officers and security personnel in schools to protect the learning environment for all the students leads to mostly young men of color getting a record for disruptive behavior and being channeled into prison as the logical result of attending K 12 public schools Rather the school to prison pipeline is a conduit opened and maintained by the statists those who promote the state before the citizen to keep as many students as possible in the public school monopoly so that the two leading teacher unions the National Education Association and the American Federation of Teachers maintain as many dues paying members as possible and to increase the number of dues payers regardless of its impact on our children The promoters of the school to prison pipeline deny African American Hispanic Asian white and other students of color from high needs socioeconomic backgrounds a choice of where to go to school If these parents or guardians want their children to go to a public charter or to use a voucher to select another private option that is where the inquiry should end the simple choice by their parents and guardians Instead the state wins by keeping more people in the state run pipeline The public unions win by keeping more unionized school staff and keeping the dues gravy train coming in to support unions who in turn use their political strength to help elect candidates who favor unionized public schools versus school choice for our children and young people How do the children win if their education options are artificially restricted The students lose by being blocked in sometimes failing public schools with no viable choice to go elsewhere And the poorer you are the fewer choices you generally have This denial of school choice would particularly impact black students as blacks have disproportionately less money than the average American *Quality of education,* 1983 United States. Congress. Senate. Committee on Labor and Human Resources,1983 **The School-to-Prison Pipeline** Peter Thalheim,2022-03-17 The school to prison pipeline is not what it is popularly advertised to be by the major media whereby the installation of safety officers and security personnel in schools to protect the learning environment for all the students leads to mostly young men of color getting a record for disruptive behavior and being channeled into prison as the

logical result of attending K 12 public schools Rather the school to prison pipeline is a conduit opened and maintained by the statist those who promote the state before the citizen to keep as many students as possible in the public school monopoly so that the two leading teacher unions the National Education Association and the American Federation of Teachers maintain as many dues paying members as possible and to increase the number of dues payers regardless of its impact on our children The promoters of the school to prison pipeline deny African American Hispanic Asian white and other students of color from high needs socioeconomic backgrounds a choice of where to go to school If these parents or guardians want their children to go to a public charter or to use a voucher to select another private option that is where the inquiry should end the simple choice by their parents and guardians Instead the state wins by keeping more people in the state run pipeline The public unions win by keeping more unionized school staff and keeping the dues gravy train coming in to support unions who in turn use their political strength to help elect candidates who favor unionized public schools versus school choice for our children and young people How do the children win if their education options are artificially restricted The students lose by being blocked in sometimes failing public schools with no viable choice to go elsewhere And the poorer you are the fewer choices you generally have This denial of school choice would particularly impact black students as blacks have disproportionately less money than the average American

Equality of Educational Opportunity and Knowledgeable Human Capital

Erwin V. Johanningmeier, 2009-10-01 This work explores how the generally accepted definition or measure of equality of educational opportunity at the beginning of the twenty first century differs from what it was in the immediate postwar era While there have been differing definitions or measures of equality of educational opportunity there has been a continual call from education critics and education reformers for more and better mathematics science and foreign language in the nation s schools This work maintains that public education acquired significance as a vital part of a national agenda in conjunction with three developments First the prosperity of the United States after World War II contributed to a consumer dominated culture and the phenomenon of the citizenconsumer The nation had to expand educational opportunities in response to the increased birth rate in the postwar years and in response to the increased qualifications that the workplace required for entry and employment Significantly the nation had the resources to send its children and youth to school for longer and longer periods of time Better educated citizens soon took better jobs and they spent paychecks buying everything from new technologies to new and bigger houses and new and bigger cars Increased household income allowed young members of the family to attend and even complete high school and increased the chance of affording the cost of attending college Second by the end of World War II the globalization of the international community was underway and the United States position and role in the international community were clearly challenged by the Soviet Union As the United States found itself in the Cold War its national security required an ideological a military and a technological strategy Each of these strategies ultimately depended on higher or post secondary education and that had lasting implications for the nation s elementary and secondary

schools The nation's engagement in the Cold War required well educated professionals to secure intelligence and to develop effective propaganda That engagement also required scientists mathematicians engineers to develop and to maintain the technology the nation required for its defense and subsequently for the space race with the Soviet Union Third and perhaps most importantly it was becoming increasingly clear in the Cold War Era that the nation would have to address its long history of denying civil rights to some of its citizens especially but not exclusively African Americans As the Supreme Court's 1954 Brown decision signified public education was the initial venue where the struggle for racial equality took place

Federal Barriers to State and Local Privatization United States. Congress. Joint Economic Committee, 1996 **The School Choice Wars** John Merrifield, 2001-03-07 What does the term school choice mean to you Opponents of parental choice have muddled its definition misleading parents and educators and drawing public debate away from the core issues In a book geared for anyone who wants to better understand this hotly contested topic Merrifield clarifies the proposals in existence today defining the key concepts related to choice Arguing for a competitive education industry he discusses policy and political strategy mistakes while suggesting corrections This informative book covers government regulation issues typical fallacies diversity issues private voucher initiatives and experiments and empirical evidence about competition

Critical Issues in Education Jack L. Nelson, Stuart B. Palonsky, Mary Rose McCarthy, 2020-08-12 Critical Issues in Education examines three questions that are at the core of the education debate in the United States What interests should schools serve What knowledge should schools teach How do we develop the human environment of schools When answering these queries the authors advocate the use of critical thinking which includes dialogue and dialectic reasoning Dynamic and interactive dialogue requires listening and assessment while dialectic stimulates the development of a creative response that encompasses both sides of an issue When applied these approaches engender an informative and stimulating discussion In order to explore the depth of current educational issues the Ninth Edition considers 15 topics providing supporting evidence and reasoning for two divergent views These issues include violence in schools the role of technology gender equity multiculturalism inclusion and disability and school choice Both civic and professional discussions regarding improvements will have consequences for students teachers and society As a result educational views and the social landscape in which they reside deserve critical study
