Beyond Poststructuralism Wendell V. Harris, 2010-11-01 **Beyond Productivity** Kim Hensley Owens, Derek Van Ittersum, 2023-11-15 In Beyond Productivity a wide range of contributors share honest narratives of the sometimes impossible conditions that scholars face when completing writing projects The essays provide backstage views of the authors varying approaches to moving forward when the desire to produce wanes when deciding a project is not working when working within and around and redefining academic productivity expectations and when writing with ever changing bodies that do not always function as expected This collection positions scholarly writers ways of writing as a form of flexible evolving knowledge By exhibiting what is lost and gained through successive rounds of transformation and adaptation over time the contributors offer a sustainable understanding and practice of process one that looks beyond productivity as the primary measure of success Each presents a fluid understanding of the writing process illustrating its deeply personal nature and revealing how fragmented and disjointed methods and experiences can highlight what is precious about writing Beyond

Productivity determines anew the use and value of scholarly writing and the processes that produce it both within and beyond the context of the losses constraints and adaptations associated with the COVID 19 pandemic *Beyond the Large Farm* Paul B. Thompson,2019-03-07 This book examines the rationale for emphasizing productivity as the dominant goal of agricultural research and challenges in the form of alternative goals that scientists might seek in performing agricultural research It presents bibliographic essays that review the criticisms of research **How Writing Faculty Write** Christine E. Tulley,2018-04-09 In *How Writing Faculty Write* Christine Tulley examines the composing processes of fifteen faculty leaders in the field of rhetoric and writing revealing through in depth interviews how each scholar develops ideas conducts research drafts and revises a manuscript and pursues publication The book shows how productive writing faculty draw on their disciplinary knowledge to adopt attitudes and strategies that not only increase their chances of successful publication but also cultivate writing habits that sustain them over the course of their academic careers The diverse interviews present opportunities for students and teachers to extrapolate from the personal experience of established scholars to their own writing and professional lives Tulley illuminates a long unstudied corner of the discipline the writing habits of theorists researchers and teachers of writing Her interviewees speak candidly about overcoming difficulties in their writing processes on a daily basis using strategies for getting started and restarted avoiding writer s block finding and using small moments of time and connecting their writing processes to their teaching *How Writing Faculty Write* will be of significant interest to students and scholars across the spectrum graduate students entering the discipline new faculty and novice scholars thinking about their writing lives mid level and senior faculty curious about how scholars research and write historians of rhetoric and composition and metadisciplinary scholars *Crisis in the Academy* Christopher J. Lucas,1998-03-15 Not since student turmoil and unrest wreaked havoc on the nation s campuses three decades ago has American higher education been the subject of so much controversy and popular criticism Countless indictments compete for the public s attention as critics explore vital issues confronting today s institutions of higher learning curricular fragmentation declining academic standards the apparent erosion of liberal learning within academe widespread neglect of undergraduate education in favour of academic research and unprecedented financial woes Confusion over fundamental priorities and purposes the author argues lies at the heart of the dilemma facing end of the century higher education Thoughtful and timely *Crisis in the Academy* offers a wide ranging analysis of contemporary higher education while making an important contribution to the ongoing public debate over the future of America s beleaguered and diverse institutions of higher learning **Beyond Texas Through Time** Walter L. Buenger,Arnoldo De León,2011-01-27 In 1991 Walter L Buenger and the late Robert A Calvert compiled a pioneering work in Texas historiography *Texas Through Time* a seminal survey and critique of the field of Texas history from its inception through the end of the 1980s Now Buenger and Arnoldo De Le n have assembled an important new collection that assesses the current state of Texas historiography building on the many changes in understanding and

interpretation that have developed in the nearly twenty years since the publication of the original volume This new work Beyond Texas Through Time departs from the earlier volume's emphasis on the dichotomy between traditionalism and revisionism as they applied to various eras Instead the studies in this book consider the topical and thematic understandings of Texas historiography embraced by a new generation of Texas historians as they reflect analytically on the work of the past two decades The resulting approaches thus offer the potential of informing the study of themes and topics other than those specifically introduced in this volume extending its usefulness well beyond a review of the literature In addition the volume editors introduction proposes the application of cultural constructionism as an important third perspective on the thematic and topical analyses provided by the other contributors Beyond Texas Through Time offers both a vantage point and a benchmark serving as an important reference for scholars and advanced students of history and historiography even beyond the borders of Texas

Osiris, Volume 38 James Evans, Adrian Johns, 2023-07-18 Perceptively explores the shifting intersections between algorithmic systems and human practices in the modern era How have algorithmic systems and human practices developed in tandem since 1800 This volume of Osiris deftly addresses the question dispelling along the way the traditional notion of algorithmic code and human craft as natural opposites Instead algorithms and humans have always acted in concert depending on each other to advance new knowledge and produce social consequences By shining light on alternative computational imaginaries Beyond Craft and Code opens fresh space in which to understand algorithmic diversity its governance and even its conservation The volume contains essays by experts in fields extending from early modern arithmetic to contemporary robotics Traversing a range of cases and arguments that connect politics historical epistemology aesthetics and artificial intelligence the contributors collectively propose a novel vocabulary of concepts with which to think about how the history of science can contribute to understanding today's world Ultimately Beyond Craft and Code reconfigures the historiography of science and technology to suggest a new way to approach the questions posed by an algorithmic culture not only improving our understanding of algorithmic pasts and futures but also unlocking our ability to better govern our present

Beyond open access: visions for open evaluation of scientific papers by post-publication peer review Nikolaus Kriegeskorte, Diana Deca, A scientific publication system needs to provide two basic services access and evaluation The traditional publication system restricts the access to papers by requiring payment and it restricts the evaluation of papers by relying on just 2-4 pre publication peer reviews and by keeping the reviews secret As a result the current system suffers from a lack of quality and transparency of the peer review evaluation process and the only immediately available indication of a new paper's quality is the prestige of the journal it appeared in Open access is now widely accepted as desirable and is slowly beginning to become a reality However the second essential element evaluation has received less attention Open evaluation an ongoing post publication process of transparent peer review and rating of papers promises to address the problems of the current system However it is unclear how exactly such a system should be designed The evaluation system steers the attention of the scientific community and thus the very course of science For better or worse the most visible papers determine the direction of each field and guide funding and public policy decisions Evaluation therefore is at the heart of the entire endeavor of science As the number of scientific publications explodes evaluation and selection will only gain importance A grand challenge of our time therefore is to design the future system by which we evaluate papers and decide which ones deserve broad attention So far scientists have left the design of the evaluation process to journals and publishing companies However the steering mechanism of science should be designed by scientists The cognitive computational and brain sciences are best prepared to take on this task which will involve social and psychological considerations software design and modeling of the network of scientific papers and their interrelationships This Research Topic in Frontiers in Computational Neuroscience collects visions for a future system of open evaluation Because critical arguments about the current system abound these papers will focus on constructive ideas and comprehensive designs for open evaluation systems Design decisions include Should the reviews and ratings be entirely transparent or should some aspects be kept secret Should other information such as paper downloads be included in the evaluation How can scientific objectivity be strengthened and political motivations weakened in the future system Should the system include signed and authenticated reviews and ratings Should the evaluation be an ongoing process such that promising papers are more deeply evaluated How can we bring science and statistics to the evaluation process e.g. should rating averages come with error bars How should the evaluative information about each paper e.g. peer ratings be combined to prioritize the literature Should different individuals and organizations be able to define their own evaluation formulae e.g. weighting ratings according to different criteria How can we efficiently transition toward the future system Ideally the future system will derive its authority from a scientific literature on community based open evaluation We hope that these papers will provide a starting point

The Reimagined PhD Leanne M Horinko, Jordan M Reed, James M Van Wyck, 2021-08-13 Long seen as proving grounds for

professors PhD programs have begun to shed this singular sense of mission Prompted by poor placement numbers and guided by the efforts of academic organizations administrators and faculty are beginning to feel called to equip students for a range of careers Yet graduate students faculty and administrators often feel ill prepared for this pivot The Reimagined PhD assembles an array of professionals to address this difficult issue The contributors show that students faculty and administrators must collaborate in order to prepare the 21st century PhD for a wide range of careers The volume also undercuts the insidious notion that career preparation is a zero sum game in which time spent preparing for alternate careers detracts from professorial training In doing so The Reimagined PhD normalizes the multiple career paths open to PhD students while providing practical advice geared to help students faculty and administrators incorporate professional skills into graduate training build career networks and prepare PhDs for a variety of careers

Beyond Capital David Hakken, Maurizio Teli, Barbara Andrews, 2015-10-23 The financial social cataclysm beginning in 2007 ended notions of a great moderation and the view that capitalism had overcome its systemic tendencies to crisis The subsequent failure of contemporary social formations to address the causes of the crisis gives renewed impetus to better analysis in aid of the search for a better future This book contributes to this search by reviving a broad discussion of what we humans might want a post capitalist future to be like It argues for a comparative anthropological critique of capital notions of value thereby initiating the search for a new set of values as well as identifying a number of selected computing practices that might evoke new values It articulates a suggestive set of institutions that could support these new values and formulates a group of measurement practices usable for evaluating the proposed institutions The book is grounded in contemporary social science political theory and critical theory It aims to leverage the possibility of alternative futures implied by some computing practices while avoiding hype and technological determinism and uses these computing practices to explicate one possible way to think about the future

Beyond Representation Richard Eldridge, 1996-03-21 The essays in this volume explore the ways in which traditional philosophical problems about self knowledge self identity and value have migrated into literature since the Romantic and Idealist periods How do so called literary works take up these problems in a new way What conception of the subject is involved in this literary practice How are the lines of demarcation between philosophy and literature problematized The contributors examine these issues with reference both to Romantic and Idealist writers and to some of their subsequent literary and philosophical inheritors and revisers Their essays offer a philosophical understanding of the roots and nature of contemporary literary and philosophical practice and elaborate powerful and influential but rarely decisively articulated conceptions of the human subject and of value
