Punishment Response:

The Punishment Response Graeme Newman, 2017-07-28 Punishment occupies a central place in our lives and attitudes. We suffer a profound ambivalence about its moral consequences. Persons who have been punished or are liable to be punished have long objected to the legitimacy of punishment. We are all objects of punishment yet we are also its users. Our ambivalence is so profound that not only do we punish others but we punish ourselves as well. We view those who submit too willingly to punishment as obedient verging on the groveling coward and we view those who resist punishment as disobedient rebels. In *The Punishment Response* Graeme Newman describes the uses of punishment and how these uses change over time. Some argue that punishment promotes discrimination and divisiveness in society. Others claim that it is through punishment that order and legitimacy are upheld. It is important that punishment is understood as neither one nor the other; it is both. This point, simple though it seems, has never really been addressed. This is why Newman claims we wax and wane in our uses of punishment: why punishing institutions are clogged by bureaucracy; why the death penalty comes and goes like the tide. Graeme Newman emphasizes that punishment is a cultural process and also a mechanism of particular institutions of which criminal law is but one. Because academic discussions of punishment have been confined to legalistic preoccupations, much of the policy and justification of punishment have been based on discussions of extreme cases. The use of punishment in the sphere of crime is an extreme unto itself since crime is a minor aspect of daily life. The uses of punishment and the moral justifications for punishment within the family and school have rarely been considered, certainly not to the exhaustive extent that criminal law has been in this outstanding work. *Punishment* Terance D. Miethe, Hong Lu, 2005 This 2005 book examines punishment in different forms including corporal and economic punishment. **The Punishment Response** Graeme R. Newman, **Punishment** Thom Brooks, 2021-03-30 Punishment is a topic of increasing importance for citizens and policymakers. Why should we punish criminals? Which theory of punishment is most compelling? Is the death penalty ever justified? These questions and many more are examined in this highly engaging and accessible guide. *Punishment* is a critical introduction to the philosophy of punishment offering a new and refreshing approach that will benefit readers of all backgrounds and interests. The first comprehensive critical guide to examine all leading contemporary theories of punishment, this book explores among others retribution, the communicative theory of punishment, restorative justice, and the unified theory of punishment. Thom Brooks applies these theories to several case studies in detail, including capital punishment, juvenile offending, and domestic violence. *Punishment* highlights the problems and prospects of different approaches in order to argue for a more pluralistic and compelling perspective that is novel and ground breaking. This second edition has extensive revisions and updates to all chapters, including an all new chapter on the unified theory, substantively redrafted and new chapters on cyber crimes and social media, as well as corporate crimes. *Punishment* is essential reading for undergraduate and graduate students in philosophy, criminal justice, criminology, justice studies, law, political science, and

sociology **Effects of Punishment on Human Behavior** Saul Axelrod, 2013-10-22 The Effects of Punishment on Human Behavior is a collection of essays that discusses the procedural and ethical issues of the use of electric shock as a treatment for severe behavior problems. The book presents the different types of extraneous aversives and undesirable side effects of punishment. It demonstrates the effectiveness of punishment procedures. The text describes the various aspects of punishment as applied to human beings. It discusses the ethical and legal issues that challenge the use of punishment. Another topic of interest is the salient characteristics and influences affecting the success of overcorrection. The section that follows describes the types of punishment. The text also provides a conceptual and methodological analysis of a technique called timeout. The book will provide valuable insights for psychologists, teachers, students, and researchers in the field of behavioral science.

The fourth edition has been thoroughly updated to reflect the latest research and has been freshened throughout with more relevant examples and better graphics.
