**The Star-Crossed Stone** Ken McNamara, 2010-11-15 Throughout the four hundred thousand years that humanity has been collecting fossils, sea urchin fossils or echinoids have continually been among the most prized from the Paleolithic era when they decorated flint axes to today when paleobiologists study them for clues to the earth's history. In *The Star-Crossed Stone*, Kenneth J. McNamara, an expert on fossil echinoids, takes readers on an incredible fossil hunt with stops in history, paleontology, folklore, mythology, art, religion, and much more. Beginning with prehistoric times when urchin fossils were used as jewelry, McNamara reveals how the fossil crept into the religious and cultural lives of societies around the world. The roots of the familiar five-pointed star, for example, can be traced to the pattern found on urchins. But McNamara's vision is even broader than that: using our knowledge of early habits of fossil collecting, he explores the evolution of the human mind itself, drawing striking conclusions about humanity's earliest appreciation of beauty and the first stirrings of artistic expression. Along the way, the fossil becomes a nexus through which we meet brilliant eccentrics and visionary archaeologists and develop new insights into topics as seemingly disparate as hieroglyphics, Beowulf, and even church organs. An idiosyncratic celebration of science, nature, and human ingenuity, *The Star-Crossed Stone* is as charming and unforgettable as the fossil at its heart.

*The Cambridge World History* Norman Yoffee, 2015-03-12 The most comprehensive account yet of the human past from prehistory to the present.

**The Archaeology of Iran from the Palaeolithic to the Achaemenid Empire** Roger Matthews, Hassan Fazeli Nashli, 2022-06-30 The *Archaeology of Iran from the Palaeolithic to the Achaemenid Empire* is the first modern academic study to provide a synthetic diachronic analysis of the archaeology and early history of all of Iran from the Palaeolithic period to the end of the Achaemenid Empire at 330 BC. Drawing on the author's deep experience and engagement in the world of Iranian archaeology and in particular on Iran-based academic networks and collaborations, this book situates the archaeological evidence from Iran within a framework of issues and debates of relevance today. Such topics include human environment interactions, climate change, and societal fragility; the challenges of urban living; individual and social identity; gender roles and status; the development of technology and craft specialisation; and the significance of early bureaucratic practices such as counting, writing, and sealing within the context of evolving societal formations. Richly adorned with more than 500 illustrations, many of them in colour, and accompanied by a bibliography with more than 3000 entries, this book will be appreciated as a major research resource for anyone concerned to learn more about the role of ancient Iran in shaping the modern world.
