United States of America Defeating the United States is the first step for China's current rulers in achieving global supremacy under a new world order based on an ideology of Communism with Chinese characteristics. The process included technology theft of American companies that took place on a massive scale through cyber theft and unfair trade practices. The losses directly supported in the largest and most significant buildup of the Chinese military that now directly threatens American and allied interests around the world. The military threat is only half the danger as China aggressively pursues regional and international control using a variety of non-military forces including economic, cyber, and space warfare and large-scale influence operations. **Deceiving the Sky: Inside Communist China's Drive for Global Supremacy** details the failure to understand the nature and activities of the dangers posed by China and what the United States can do in taking needed steps to counter the threats. **A Vision of Ireland**, Eugene Davis, 1889 **The Sky Soldiers** Victor R. Blue Sky Metropolis Peter J. Westwick, 2012-06-04 Like citrus, oil, movies, radio, and television, aerospace helped create Southern California and embody its values. **Blue Sky Metropolis** launches an entirely fresh consideration of an iconic industry that answered the immemorial hunger of the human race for flight and the future. Kevin Starr, University of Southern California. **Blue Sky Metropolis** presents an intriguing survey of a unique time in Southern California history when cheap land and benign weather lured massive aerospace enterprises to the region, eventually serving as home to nearly half of the nation's defense and space fabricators. Before there was a Silicon Valley, high-tech dreamers were on the loose in the Southland, creating inventions as diverse as the Voyager planetary spacecraft and the Stealth bomber. These highly readable essays help us understand how it happened, how Southern California shaped aerospace and vice versa. Charles Elachi, Director, Jet Propulsion Laboratory. Peter Westwick has assembled a rich collection of essays that tell a wonderful story about the importance of the aerospace industry to Southern California and the importance of Southern California to the aerospace industry. There's technology, sociology, economics, geography, anthropology, and much more woven through the chapters. It's an ambitious project, but it succeeds in being interesting, informative, and entertaining. Michael Rich, President and CEO, The RAND Corporation.
