Secrets Stay Secret examines modern trends in intelligence oversight development by focusing on how American oversight mechanisms combine to bolster an internal security system and thus increase the secrecy of the intelligence enterprise Genevieve Lester uniquely examines how these oversight mechanisms have developed within all three branches of government how they interact and what types of historical pivot points have driven change among them She disaggregates the concept of accountability into a series of specified criteria in order to grapple with these pivot points This book concludes with a discussion of a series of normative questions suggesting ways to improve oversight mechanisms based on the analytical criteria laid out in the analysis It also includes a chapter on the workings of the CIA to which a number of CIA officers contributed

Storytelling Organizational Practices David M. Boje, 2014-06-20 Once upon a time the practice of storytelling was about collecting interesting stories about the past and converting them into soundbite pitches Now it is more about foretelling the ways the future is approaching the present prompting a re-storying of the past Storytelling has progressed and is about a diversity of voices not just one teller of one past it is how a group or organization of people negotiates the telling of history and the telling of what future is arriving in the present With the changes in storytelling practices and theory there is a growing need to look at new and different methodologies Within this exciting new book David M Boje develops new ways to ask questions in interviews and make observations of practice that are about storytelling the future This after all is where management practice concentrates its storytelling while much of the theory and method work is all about how the past might recur in the future Storytelling Organizational Practices takes the reader on a journey from looking at narratives of past experience through looking at living stories of emergence in the present to looking at how the future is arriving in ways that prompts a re-storying of the past

What Dying People Want Dr. David Kuhl, 2011-07-27 An internationally renowned palliative care physician offers guidance on living with a terminal illness Based on research funded by the Soros Foundation and extensive interviews with dying people A profound and practical book about living with a terminal illness over a long period of time It offers guidance solace and helpful strategies for people who are terminally ill their families and caregivers Facing death results in more fear and anxiety than any other human experience Western medicine has accomplished a great deal in addressing physical pain and controlling symptoms for people with a terminal illness but much slower progress has been made in understanding and alleviating psychological and spiritual distress In What Dying People Want Dr David Kuhl begins to bridge that gap He does so by addressing end of life realities physical psychological and spiritual through his own experiences as a doctor and through the words and experiences of people who know that they are dying He presents ways of addressing the pain of finding new life in the process of dying and of understanding the inner reality of living with a terminal illness He acknowledges the despair and recognizes the desire for hope and meaning Dr Kuhl also makes the provocative case that insensitive communication by doctors creates more suffering for patients than either the illness or the knowledge of impending death and offers both the dying and their caregivers guidance on preventing painful interactions He provides ways of speaking about difficult topics with physicians family members friends and those who have a terminal illness This book started with a research question What is the daily experience of living with a terminal illness How does that experience

affect your sense of self your relationship with others and your understanding of the spiritual Many of those I interviewed asked me to share what they had given me with others who would follow those with a terminal illness as well as their friends and family members who would care for them and about them They asked specifically that I write a book for a general audience and not only for my colleagues in the medical profession This is the book that grew out of that research Dr David Kuhl
