Sectional Maps Of Western Canada 1871-1955 An Early Canadian Topographic Map Series:

Sectional Maps of Western Canada, 1871-1955 Lorraine Dubreuil, Association of Canadian Map Libraries and Archives, 1989 A bibliography identifying map sheets in some of the topographic map series which were produced in Canada before the introduction of a National Topographic System in 1923 Western Canada for this work comprises the Northwest Territories and the present day provinces of Manitoba Saskatchewan Alberta and British Columbia

Non-standard Collection Management M. Pearce, 2018-11-09 First published in 1992 this volume recognises that it is not unusual when practising librarianship to come across small to medium collections within the library which because they are different from the main collection are outside the librarian's experience or are a new type of material not properly managed or exploited Therefore this volume contains chapters on a range of materials which are united by a certain rarity in the experience of most librarians It is aimed at those who need to know how to progress from scratch with a collection but not necessarily to take it into complete specialization There is information about characteristics of each type of material as well as guidance for their management Lists of further reading are provided and a note of some important collections

Terra Nostra Jeffrey S. Murray, 2006-04-01 Maps have been invaluable throughout Canada's history They promised fame and fortune to early merchant adventurers and guided army commanders They legitimized a politician's dominion and allowed businessmen to stake new claims And they helped ordinary citizens build communities
